### **Registration**

## **File menu**

The File menu includes commands that enable you to select a file and to scan it.

For more information, select a File menu command name:

<u>Open</u>	Select a file for scanning.
<u>Scan</u>	Scan the selected file.
<u>Save setup</u>	Save TextScan environment.
<u>Exit</u>	Leave TextScan

## **Options menu**

The Options menu provides commands for specifying the treatment of tab and escape characters.

For more information, select an item:

Ignore escape

Tab

## **Help menu**

The Help menu provides useful information on using TextScan.

For more information, select an item:

- [Index](#) Displays an index to on-line help on TextScan.
- [About](#) Displays information on TextScan.

**File menu Open command**

Use the Open command to choose the file you wish to scan.

**File menu Scan command**

Use the Scan command to perform a scan of the chosen file. TextScan will refuse to accept files with extensions '.bmp', '.exe' and '.gif'.

**File menu Save setup command**

Use the Save setup command to keep your TextScan environment for the next time. This includes window position and tab expansion.

**File menu Exit command**

Leave TextScan.

### **Options menu Ignore escape command**

Use the Ignore escape command to cause TextScan to disregard text in a line after the escape character.

**Options menu Tab command**

Use the Tab command to specify the number of blanks to which tabs are to be expanded.

**Help Index command**

Use the Index command to access TextScan's on-line help information.

**Help About command**

Use the About command to display TextScan's version number, copyright notice and registration information.

## Registration details

TextScan for Windows is a shareware program. If you use it for more than the 21-day trial period, send the nominal registration fee of £5 sterling or US \$9 to:

David R. Tilley,  
67 Tolworth Park Road,  
Surbiton,  
Surrey,  
KT6 7RJ,  
UK.

If you don't register, please don't use the program.

The archive from which you obtained TextScan may also have the MS-DOS version. Please indicate whether you wish to hear of that or other products.

Registered users may e-mail bug reports and suggestions for improvement to:

drt10@phx.cam.ac.uk
