

c
... Buttresses
b begun only
a

Decorations on central
buttress. All done with
one moulding; m
no subordination, but
the foliations cut
smaller than the rest.
No capitals of course

Plan of east end from
the transepts. d, e, f are the
perfect windows c has
the triangle space carved
but has no flamboyant
tracery above it and
the crockets are poorer
and heavier, while d and
e have no Δ work, only
crockets and animals
and these much poorer.
The band of arabesque
above all is full of
fancy, but clumsy and
debased.
