          HISTORY OF MOUSE

          ALWAYS REMEMBER
```

1.2 freeware

```
        FREEWARE

        This  program  is NOT PD, but it is FREEWARE in other words it
        is  copyrighted by me (Master Brain) for ACO utilities, but it
        is  freely  distributable. This means that you are not allowed
```

to take any fee for the program.

1.3 warranty

NO WARRANTY

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED
BY APPLICABLE LAW.   EXCEPT WHEN OTHERWISE STATED IN WRITING
THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM
"AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR
IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES
OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE
ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM
IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME
THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.
IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN
WRITING WILL ANY COPYRIGHT HOLDER, OR ANY PARTY WHO MAY
REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU
FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR
CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO
USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR
DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR
THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY
OTHER PROGRAM), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN
ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

1.4 distribution

DISTRIBUTION

You may copy and distribute verbatim copies of the program's
executable code and documentation as you receive it, in any
medium, provided that you conspicuously and appropriately
publish only the original, unmodified program, with all
copyright notices and disclaimers of warranty intact and
including all the accompanying documentation, example files
and anything else that came with the original. You may only
charge a small fee for the costs of media, handling and
postage.   Mouse may not be distributed along with or as part
of commercial products without a license from the author.

1.5 introduction

INTRODUCTION

Haven't you also been jealous of the PC owners with all their
mouse drivers?   You don't have to anymore, because here is
what you all have been waiting for!
A MOUSE DRIVER FOR THE AMIGA.

```
This  mouse  driver is compatible with all known Amiga mouses.
All you have to do is to install it in your startup-sequence.
```

1.6 system

```
SYSTEM REQUIREMENTS

Mouse  requires at least AmigaOS 1.0 and a WORKING Amiga (It's
works  best  if  the  Amiga  is turned on.).  You also need at
least one diskdrive but a harddisk is recommended. If you have
a  68030  or  a  68040 the mouse doesn't go faster.  Mouse has
been tested on:

Amiga 500 1 MB ram 10 MB hd
Amiga 500+ 3 MB ram 11 MB hd
Amiga 500+ 68030 25mhz 5 MB ram 45 MB hd
Amiga 2000
and a few other configurations
```

1.7 instalation

```
INSTALATION

Just copy it to your C: directory ans run it (You have to  run
it on your SYS: patition if it is going to install  the  mouse
driver properly.
You  proberly  want  to  include  it  in your startup-sequence,
consult your amiga manual how to do that.
```

1.8 usage

```
USAGE

MOUSE <mouse type>

        <mouse type> = 1 Standard Amiga mouse (original A500)
                       2 Nimbus mouse
                       3 Jin-Mouse
                       4 G I Mouse
                       5 G I Optical mouse
                       6 Other Optical mouses
                       7 Boing mouse
                       8 New standard Amiga mouse (original A4000)
                       9 Any track ball
                      10 Fancy Mouse (transparent cover)
                      11 Any three button mouse
                      12 Any other mouse
```

1.9   thanx

```
THANX
        Thanks to all the members of ACO

A specila thanx to my MOTHER

And  ofcause  Commodore  for the AMIGA, Pepsi for the greatest
drink  of  all, Front  242  for  the good music, Zippo for the
great  lighters,  Colgate for the good toothpaste, Grümz for a
funny Christmas  card,  Ilford  for  great photographic paper,
Clash for more great music, ME for just being  ME, Pioneer for
their eargasm, KSMB for being playing again, OXEN in  Forshaga
for  the  greatest Pizza  ever,  Douglas Adams for the BOOKS,
Maxel  for  diskettes,  and  a lot  more that I cant remember.

No  thanx  to  IBM  for  the  CP,  Apple  for  the  Machintosk,
Riksskatterverket for wanting money of me, and more.
```

```

1.11   history

```
1.1     Fixed a bug which caused my girlfriend to leave me (that bug
        succeeded with what I had tried to do for months)

1.122   Fixed a little silly bug which caused the pointer to go backwards.

2.0     Totally rewritten the code, because the compiled code of version 1.22
        was too big (1,3 MB)

2.1     Fixed a user interface with a lot of buttons.

2.2     Removed the user interface because the buttons didn't do anything.

2.3     Bug fix. When I removed the user interface I accidentaly removed some
        other code, so when you started mouse it removed the pointer.

2.4     Internal release.

3.0     Completely rewritten the code again. Now mouse is 2000% faster.

3.1     Included a Hires (660 * 530 * 16) Screen shot of my workbench
```

screen which is shown at startup.

3.2   Slowed down the code a bit (the mouse has been much too fast
         since version 3.0, now it's back to normal speed)

3.3   ????

3.4   Removed the screen shot (It was too hard to update the program every
         time I changed anything on my WB)

3.5   At last now it works with WB 1.3 !!!!

3.6   Removed another bug (Who is putting in all those errors in my
         code, I have to take a chat with my cat!)

3.7   Remembered that I didn't have any cat (after I had tired to talk to
         it for an hour)

4.0   Had nothing to do so I just changed the version number.

5.0   Added the actual mouse driver code to the mouse code. So now this
         program actually works!

5.1   Removed the mouse driver code again (It was too boring)

5.2   Fixed something, I don't remember what.

5.9   Added the standard mouse (so now the standard amiga mouse works with
         it)

5.3   Oops the last version number was wrong.

6.0   Now it works with WB 2.0+

6.1   Included colors in the output copyright text

7.0   Another boring day with a new version number

7.06   Added a lot of mouses.

7.062   Included version string

7.099   Fixed nothing

7.1   Now it's returns 0 if the instalation worked properly.

7.12   Now the archive includes a AmigaGuide version of the
         documentation

1.12   remember

```
        //
       //
    \ //   Only Amiga makes the impossible possible
```

```
\X/
```

```
