#### Weapon infos:

Shots/s - Mah, I don't know :-)  
Deviat - The lower, the better precision.  
Range - The distance the bullet can reach. In case of autoguided weapons this is the distance after which the missile begins to follow the nearest ship.  
Damage - Single bullet damage. (before arming and not counting splinters).  
Power - Average damage for 1 second burst.  
Ammo - Number of shots.  
Time - Lifetime of the bullet. For autoguided weapons this is the time after which the missile begins to follow the nearest ship.

## 1.6 Weapons

Machine Gun 1-5                      Standard gun. Medium range. Quite weak. Each model have it's own speed and Shots/s rate. Bullets appears grey in color.

Big Gun 1-3                              Same as above, but the autofire is very slow. It's between 5 and 6 time more dangerous than MG. This is a long range weapon. Bullets are orange.

Small Rocket 1-3                      They have accelerated movement and an explosive warhead. They strike a damage just like BG1, but can bump your opponent against a wall. The color is white.

Medium Rocket 1-3                      They are similar to SR, but they are slower and 3-4 time more harmful.

Large Rocket 1-3                      More dangerous versions of MR. They are really powerful, but also very heavy. Usually you can carry only a few shells.

Turbo Gun 1-3                            High powered version of machine guns. Only little ships (which can't mount heavier weapons) can carry these guns.

Missiles 1-4                              Simple missiles. They are quite easy to avoid because of their strong inertia, but don't try to exceed them in speed!  
When you launch a missile, it starts just like a small rocket. After a certain amount of time (lower in Mis-1, higher in Mis-4), the missile begins to follow the nearest ship. So don't launch a missile-1 when your opponent is far and vice-versa.

---

Ammo3 (1 pixel = 2 bullets)  
Ammo4 (1 pixel = 2 bullets)  
Number of missiles that are following you.

- YAGG seems to hang when QuickGrab is running.

Please report all the bugs you find !!
