Chapter 1

in

1.1 main

                                    Hi Everybody !

At first i wanna say sorry for my fucking english. So don't wonder that
something will be difficult to understand what i mean.
It's my first game written in AMOS Pro.
This Game is SHAREWARE. See the Details under this Point !

            Copyright

            The Game

            Adress

            Shareware

            Bugs

            Do it better

            What next ?

1.2 copyright

                        Copyright

This Game is not for commercial use ! You can give it unchanged to other
Persons only for no Money or for a small Reward for copying it to another
Disc.

1.3 game

                          The Game

You know this Game under the Name Black Jack, but its only with 32 Cards.
Thats makes it faster and its realy the german Way to play this Game. The
missing Cards are from 2 to 6. You got only the Cards from 7 to the Ace.
For People they never play it befor here the Rules:
You must come very closed to the Amount of 21 Points. If you or the Bank
(thats the Computer) mean its enough and take no more Cards, then the other
one must try to reach more Points (but not more then 21 !).
But remember, if you take no more Cards you got no second Chance to reach
21, because you have finished the Game on this Way.
The Bank win, if the Points are the same (as example you got 18 and the
Bank to). So you must get every Time more than the Bank.
Points over 21 lose.
There is only one Exception: When the Game starts and the first 2 Cards are
2 Aces. Thats called Fire. The Person with Fire is the Winner.
For one Card more press with the left Mousebutton on the Cardstuck.
Do you wish no more Cards, then you press on "Ready !".
If you wanne quit, then you must press the right Mousebutton and klick in
the Menu the Button "Quit".
And now how much Points is which Card.

          The Cards

1.4 cards

                    The Cards

                 Points of the Cards

                      7=7
                      8=8
                      9=9
                     10=10
                      J=2
                      Q=3
                      K=4
        Ace=11 or by more then 2 Cards and more then 11 Points =1

1.5 adress

                   My Adress:

                   Rolf Noch
                   Neustadt 74
                 46446 Emmerich

                   Germany

```
                         e-Mail:
                         --------

                 Rolf-Pattex-Noch@T-Online.de
```

1.6 shareware

```
                             Shareware
```

If you wanna get good Games and Tools for a low Price, then support the
Programmer of Shareware.

```
              The Price of this Game is only 8 US-$.
```

It's only 10% of a normal Price, so please support my Work for the Amiga !
If you make a new Cardset and put it to Game/Think in the Aminet, then you
don't must pay the Share.

```
            All others send the Share to my
                Adress
                please !

                 I only accept cash !
```

1.7 bugs

```
                            Known Bugs
```

Sometimes the Bank will not take another Card and you win. Thats realy not
a big Bug, so i dont change it.
Wright me, if you got Problems with your Amiga. I have wroght this Programm
on a A1200 (sometimes with a Speedercard and sometimes without, because it
was damaged). There was no Problems.

1.8 doit

```
                           Do it better !
```

The Cards are very ugly and it was a problem for me to get this with the
right Colours. The Cards are found in the Drawer CARDS. Its in the typical
ABK-Format of AMOS.
In the April of 1996 I will put a Converter, a Cardset in IFF-Format and a
new and sexy Cardset (for our young Friends) in the Aminet (Game/Think -its
already done). I have used the Converter to make my first Cardset a little
bit better. Its absolutely easy to work with him. For a new Set you need
only my IFF-Cardset and a Paint-Program like DPaint ore PPaint. After your
creative working you use the Converter and oops its ready ! Save the Cards

in the Drawer CARDS and after starting the Game, you can load the new
Cardset with the Point "Load Cards" in the Menu.
Please upload your Cardset in the Aminet if you can, because I wanne have
some Fun with your Cardset to.
Put it to Game/Think in the Aminet. Also you don't must pay your Share !

                    For more see under
              Copyright
                  .

1.9   next

                             What next ?

I wanne wright a Jump'n Run and a Adventure like Lucas-Arts-Adventure. You
can wright me every Time your Ideas. I will wright your Names in the Docs,
if I use an Idea of you.
