VeggieTales – LarryBoy and the Bad Apple is a platforming / puzzle adventure game for the Nintendo GBA. Inspired by the upcoming feature length DVD, this game centers on the themes of temptation and moderation. Players will take control of LarryBoy, the caped cucumber crusader, and try to stop the evil Bad Apple from tempting several citizens of Bumblyburg. In order to do this, players will take on a series of time based platforming missions located in a variety of wild areas around the city, as they try to help LarryBoy track down tempted characters. Once they have found the misguided character, players will help LarryBoy free them from the spell of the Bad Apple by lowering their temptation level.

The VeggieTales brand has sold over 42 million video units & over 5 million audio units in 12 years and over 1 in 4 U.S. households with kids have purchased or viewed VeggieTales, making the launch of the new *LarryBoy!* title the game kids have been clamoring for!
