## **LINDSAY PARMENTER**

### **Producer**

As a producer at Krome Studios, Lindsay Parmenter is responsible for managing all facets of the product(s) he works on including: scheduling, monitoring deadlines, task management and allocation, documentation, liaising with publishing partners and Quality Assurance team. Most notably, Mr. Parmenter oversees the development and production of the company's flagship series, *TY the Tasmanian Tiger*. He is focusing his efforts on the next TY (3) project which follows the successful footsteps of *TY the Tasmanian Tiger™ 2: Bush Rescue™*.

Mr. Parmenter is a young and talented individual who has risen through the ranks since joining Krome Studios in 2001. His tireless dedication has helped maintain the company's spotless record of staying on time and on budget. Currently, he oversees and motivates a team of 40 Krome staff comprised of artists, programmers, designers, audio/sound engineers and production assistants. Prior to working on the TY series, Mr. Parmenter was the internal producer on *The Adventures of Jimmy Neutron Boy Genius™: Jet Fusion™*.

Mr. Parmenter has always displayed a great amount of passion and interest in games, even as a young child he knew he wanted to be involved with making computer/video games. He was an avid fan of classic titles such as *StarFlight*, *StarControl 2* so he jumped at the opportunity to work with Australia's leading game company. Coincidentally, his older brother was already working at Krome Studios which helped him get his foot in the door.

He is a gamer at heart, but prides himself on having a diverse background and points of interest including wildlife conservation and the study of marine fauna. Before joining Krome Studios, he was involved with the CSIRO (an Australian Government science organization) where he worked to measure the effect of trawling on sessile benthic invertebrates. He has also done extensive volunteer research with the Queensland National Parks and Wildlife service, helping with their Marine Turtle conservation program.

His other interests include sea turtle conservation, snorkeling, traveling, Rugby and B-grade horror movies. Mr. Parmenter, 24, has a Bachelor of Science: Zoology from the University of Queensland.
