

Xicat Interactive Press Release

April 26, 2001

Xicat Interactive to release three Playstation®2 Titles this year.

Xicat Interactive is pleased to announce the release of three new titles this year for PlayStation®2. These titles, Top Angler, Flying Circus, and Match Point Tennis, all feature cutting edge graphics, next-generation technology and Xicat's commitment to quality.

Xicat's President, Reto Bodmer, had this to say about the announcement: "Xicat is very happy to be making such a large presence on the format (PS2). We feel Sony's large market share coupled with the great quality of these games will equate to great success, both commercially and critically."

Top Angler

Realistic environments and challenging scenarios abound in **Top Angler**. The latest next-generation fishing game from SIMS, the developers of the Dreamcast® hit Sega® Bass Fishing™, puts you right out in the water. A robust graphics engine featuring state-of-the-art visuals uses the power of the Playstation®2 to its fullest. Accurate and detailed fish models bring Largemouth Bass, Redeye, Bluegills and more to life. Compete in a challenging Campaign mode, a time-attack based Tournament mode, or the fast paced Arcade mode.

Top Angler features immersive environments, with night and day and weather cycles. Use careful strategy to catch motion captured Bass with photo realistic models and skins. A new and innovative split screen mode depicts all the action of the fight.

Top Angler is scheduled for release in North America on March 26th, 2002, and in Europe on April 26th 2002.

Flying Circus

Flying Circus is a remote control helicopter simulation for the Playstation®2 game console. Earn your RC Pilot's license in challenging real-world events, then take your skills into fantasy based obstacle courses. The technique and skill of RC Copter flying combined with obstacles, scenarios, and events create a challenging and fun game.

Flying Circus features 4 modes of game play to choose from; Adventure Mode, Competition Mode, Free Flight and Challenge Mode. Purchase nine real licensed Copters, and outfit them with points earned in each mode. With a flight model based on technical data and input from RC manufacturers like Kyosho, Flying Circus features dynamics and controls that are so realistic, you'll think you're flying the real thing.

Flying Circus is scheduled for release in Q3 2002.

Match Point Tennis

Match Point Tennis for Playstation®2 is a furiously fast tennis game featuring licensed tennis names and likenesses. Sixteen real player models and faces render beautifully with the game's original engine, taking full advantage of the PS2 hardware. Compete on five courts around the world and climb to the top of the International rankings. Whether its indoor, outdoor, clay or concrete, it's available in Match Point Tennis. Match Point also features over 70 conference matches, a single match mode, and multiplayer mode up to 4 people at once. With development concentrating on strategy rather than pong-style gameplay, Match Point raises the bar for tennis games. With an adaptable learning curve, Match Point is as challenging for pros as it is fun for beginners.

Match Point Tennis is scheduled for release in Q4 of 2002.
