

**TC Swordplay** is a game where you block and lunge your sword against the computer's sword. A hit is made on the computer when you are able to maneuver your sword past the computer's sword. Also, a hit is made on you when the computer's sword is able to pass your sword. The trick is to get past the computer's defenses and strike the computer before you get hit. A good strategy is to lunge your sword while changing direction simultaneously.

**Movement**

Place the arrow at the area you wish to block or lunge at.

**Mouse Buttons**

Left: Lunge Forward

**Objective**

Lunge your sword past the computer's sword without letting the computer's sword reach your end first.
