

# **Windows to CD-i**

**A simple way to deliver your  
presentations on CD-i.**

# What is CD-i?

 **CD-i is a TV multimedia unit that can deliver CD-quality sound, photo-realistic images, graphics and full-screen motion video with stereo soundtrack.**

# Why Use CD-i?

- Cost effective** - same cost as a good VCR
- High quality output** - TV
- Reliable** - consumer hardware
- Simple to operate** - just like audio CD
- Tamperproof** - not a computer
- Worldwide standard** - plays anywhere

# What Can I Do With It?

**The software supplied allows you to convert presentations like this into CD-i format. A click on the mouse or remote controller button 1 takes you forward, click button 2 to go back.**

# What Else Do I Need?

- **WinOnCD Software to record the output file onto a WORM as a CD-i image**
- **CD-recorder.**

# What If I Want to Do More?

 Philips Media produce a full range of systems for the design and production of CD-i titles with graphics, sound and video. These allow designers or programmers to produce stunningly realistic and involving multimedia for business and consumer use.
