System Requirements

Operating System

Your computer must have Microsoft Windows 3.1, Microsoft Windows for Workgroups 3.11, Microsoft Windows 95, or Microsoft Windows NT 3.5, or higher versions of these operating systems.

Disk Space

The clip art and photograph reader requires approximately 6 megabytes of disk space on your hard drive. The images will remain on the CD ROM.

Hardware

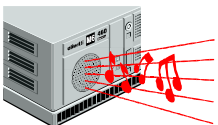

A mouse or pointing device is required.

A CD-ROM reader is required to use the program.

To print out any items you create or save in this program you must have a printer. Although the program will operate with dot matrix printers we recommend ink jet or laser printers for the best results.

In order to hear sounds you must have a sound card and speakers.

For Windows 3.1, Windows NT or Windows For Work Groups

1. Turn on your computer and start Windows. Insert the CD-ROM into the CD-ROM drive.
2. From the Windows program Manager, click on **F**ile and click on the "Run..." command.

3. In the command line, type the letter of your CD-ROM drive followed by a colon (:) and the word "cdsetup." For example, if you are installing from your "D" drive, type:

D:Cdsetup

For Windows 95

1. Turn on your computer. Place the CD-ROM in the CD-ROM drive.
2. In the Windows 95 startup screen, double click on the "My Computer" icon.
3. Double click on the CD-ROM drive icon.
4. Double click on the Cdsetup or Cdsetup.exe icon.

Running 12,000 Images +

After you restart Windows 95, you will have a new 12,000 Images + group. You may start the program by using the  key (Windows 95 start) and selecting the proper icon for the art you wish the review.

In Windows 3.1, click on the 12,000 Images + group and select the 12,000 Images + icon.

Welcome to 12,000 Images +

12,000 Images + is one of the best values in computer software. Besides thousands of high quality, highly detailed, artist-drawn original clip art, 12,000 Images + provides you with 500 sound effects, and phrases for use in greeting cards and other publications.

The clip art is provided in either PCX or WMF format. PCX and WMF formats are standard formats for interchange of graphics. These images can be imported into almost any windows application including Microsoft Word, Corel Word Perfect, Ami Pro, and Corel Draw.

The photographs are provided in TIF format which is also a standard format for interchange of graphics.

Phrases are saved as bitmap (BMP) files, which can also be imported into almost any windows application.

12,000 Images + provides the Kudo Image Reader so you can view the clip art or photos in full color.

To print or edit the clip art, you must export (copy) the file off the CD and then use them in any program which can print or manipulate graphics.

Categories of images

12,000 Images + contains several catalogs of clip art. Select the type of images and format which you want and then look in that catalog with the Kudo Reader for the type of images you desire.

The specific locations of color and black and white images or photos is listed below. Here are the major subdivisions:

- | | |
|-----------------------------------|-----------------------|

TIF FILES

The photographs are stored as *.tif files. Tif compression is usually used because the tif format compresses photographs quite well. You may export the photographs to any program which can view or manipulate *.tif files.

SOUND EFFECTS

Windows allows you to assign sounds to different system and application events. For example you can select and assign a sound to play every time you open an application or close Windows. Working in Windows you can use any sound file with a WAV. To learn how to associate a sound to an event, please see your Windows manual or on line help.

Like the clip art and photographs, the sound clips are located on the CD ROM, and must be copied over to the hard drive as you need them.

Playing Sound Effects

Windows 3.1 provides a sound recorder utility in the Accessories group. In Windows 95 you may play sound effects by clicking on the sound effect's icon. You may use any other sound program to listen to or to modify the sound effects. Many multimedia presentation programs can also include and play *.wav files. See your Window's users guide or manual for further information on playing "wav" files.

Index of sound files

A file is provided on the CD ROM which contains an index of the 500 sound effects provided in this program. Please click on the SOUND EFFECTS list icon. This list provides word search capability so that you can locate the sound effect that you need.

Reuse of images and sounds- Licensing

Use of the computer program is subject to the license terms shown on the back page of this manual.

We encourage users to create paper publications using the clip art, phrases and photographs contained in 12,000 Images +. We are very proud of the fact that many professional designers create brochures, posters, greeting cards and other materials using the images in this program. There is no fee or permission

required for the use of the clip art, phrases or photographs so long as you follow these simple rules:

(a) tangible products like posters, brochures, newsletters or business cards incorporating clip art, phrases or photographs must contain a copyright notice for your work and the statement:

“Portions Copyright 1996 Media Graphics International.”

(b) Any derivative product created for distribution may not contain more than five clip art images, photographs or phrases per page.

(c) Redistribution of graphics in computer format is not permitted.

The “business logos” category includes items which are subject to trade mark restrictions. Use is conditioned on your legal authority to use the trade mark.

Enjoy!

Support

We encourage all of our users to provide comments and suggestions about this program.

This program is supported by voice, fax and Internet e-mail.

Voice

is available as follows (all times are in the Pacific time zone):

Monday through Thursday, 8:30 am - 12:00 noon and 1:00 pm - 4:00 pm.

Friday, 8:30 am - 12:00 noon. You may call 310-886-3510 with your support questions.

Internet

Support questions may be addressed to COS550@AOL.COM

Fax

You may fax us at 310-886-3517.

Acknowledgements

Team Cosmi, the only fully integrated software developer and publisher in the budget software industry, wishes to give special thanks to Team Cosmi members who made special contributions to this program:

Concept: George Johnson
All in house programming: James Shaw

Team Cosmi thanks Karen Doyle and Dan Aungst at Media Graphics International, Inc., for their usual, exceptional work and help on making this program a reality.
