Beyond the bounds of paper

Move up to Acrobat Exchange™ 2.1 and get Acrobat working for you!

You are using Acrobat Reader to view a Portable Document Format (PDF) file created by someone else. But you can do much better with Acrobat Exchange 2.1.

With Acrobat Exchange 2.1, you can create your own PDF files. That gives you complete control over how your documents look, how they're used, and who accessses them—at all times.

Create PDF files from your business applications. The Acrobat PDF Writer, included with Adobe Acrobat Exchange™ allows you to **"print" directly to a PDF file** from any Macintosh® or Windows® application.

Add electronic navigation aids and notes. Create **links and bookmarks** that instantly take you to related information, no matter where it resides. Even in other PDF files or other applications—on your PC, corporate network or even the World Wide Web.

Add life to PDF files with Movie links to movie and sound clips—great for presentations.

Create Article Threads that let you easily guide your reader through a multi-column document on-screen.

Use multi-user Notes to easily review documents electronically and speed up the review process.

Find information fast with Acrobat Search. Search for single words, whole phrases and other information across thousands of documents on your computer or on a network.
Protect your data.

The security features in Acrobat Exchange 2.1 provide an excellent way to control access to documents, more easily and efficiently than is possible with paper. You can password-protect your PDF file or give users read-only access to a file by enabling or disabling features such as print, save, and the ability to make any changes or select text and graphics.
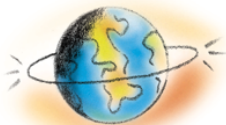

Integrate Acrobat with your existing applications.
With its open architecture, Acrobat software adapts to your needs and applications. It supports Lotus Notes® / FX, OLE, DDE, AppleEvents and AppleScript™, so you can easily incorporate it into your application environment. And you can get started with Acrobat now, because it works with your existing file servers, applications and e-mail software.
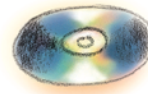

Publish on the World Wide Web

The World Wide Web makes it easy to communicate with the rest of the world. And with Adobe Acrobat Exchange 2.1, publishing on the Web is easier than ever before. There's no need to re-author or program your document in HTML. Break through the clutter by publishing graphically rich, full-color files that preserve your corporate identity.
The Weblink tool lets you add links that connect your PDF file to documents on Web servers anywhere on the Internet. Easily embed a Universal Resource Locator (URL) within your PDF file and viewers can immediately connect to the related document—whether in HTML or PDF—wherever it may be on the Web. Be sure to visit Adobe at *http://www.adobe.com/* for the lastest Acrobat information

Publish on CD-ROM

Update sales collateral and technical documentation fast. CD-ROM technology makes it possible to publish vast amounts of information on one convenient and portable disc. And with Adobe Acrobat Exchange 2.1, you can publish visually rich PDF files across computer platforms. So whether your audience uses a Macintosh,® Windows,® DOS or UNIX® system to access your CD-ROM, they'll see your message exactly as you created it.

How can you use Acrobat Exchange?

① Publish Across Platforms

Save time by distributing your files electronically,in PDF, allowing the widest possible audience to access them. Macintosh, Windows, DOS and UNIX system users can all view PDF files regardless of the application used to create the original document. Say goodbye to overnight couriers and the copy center!

② Electronic mail.

By attaching a fully formatted PDF file to your e-mail message, you can send your latest proposal to your team for input. And, they can print it to their own local printer complete with text, graphics and images.
③ Network servers.

Post PDF files on your network server to share documents within your workgroup or across departments. Improve sales force productivity by providing instant access to your collateral materials, electronically.

④ Lotus Notes software.

Tired of "un-desktop publishing" your documents into RTF for your Lotus Notes database? Share fully formatted documents in Lotus Notes. And, colleagues can comment on PDF files in the database by using Acrobat Exchange 2.1 software to annotate the shared PDF file.

Yes, I want Acrobat Exchange
