

PD Pig Out!™ Manual

Decompressing ...

- Create a new folder on your hard drive and be sure you have at least 8 megs free. If you have the BBS in a BOX CD you can skip this install section and just copy it to your drive or use directly from the CD-ROM.
- Copy all contents of the [PD Pig Out!™](#) disks into this new folder.
- Double Click on PD Pig Out!™.1. and watch the progress graph as the files are joined.
- Watch the graph as the combined file is decompressed. This may take awhile.
- [PD Pig Out!™](#) is now ready for use. Double click on it and Launch HyperCard.

Running the Stack...

You may Clean the stack or empty its contents by pushing the Clean stack button. Normally, this is done only prior to importing a new text file. MacWizards has new text files available on a monthly or quarterly basis for \$3.00 each. These updates can be imported into [PD Pig Out!™](#) for your use.

he Import Files button simply asks you for the Allfiles.db text file to update your copy of [PD Pig Out!™](#). You can use the Clean stack button first and import all the files or just import the new records since your last install.

Pushing the Find File Button will search for your selected text string in this massive stack. It is a good idea to use at least the first 4-5 characters of the word you are looking for. Once it locates a record that matches your request, you can hit a carriage return to continue the search with the same key word.

Pushing the View files button simply takes you to the descriptions area for viewing. Once you have reached this card you can search the library manually using the arrow buttons or the show all button will display them at the rate of about 1 per second. Watch out this guy may wink at you!

Searching thoughts...

With [PD Pig Out!™](#) you have several basic options for display. Pressing the sort button will allow you to sort the records by name, size or date. Pressing command - period cancels the sort request. The stacks standard format is by date. Sorting in this manner will allow manual and show all viewing to be in the order you may want.

he show all command will allow you to zoom through the available files and stop by clicking on it a second time.

f you have the BBS in a BOX CD-ROM mounted the import folder will allow you to designate a folder on your drive to copy those files you want, to this folder while viewing them in [PD Pig Out!™](#).

f you have the BBS in a BOX CD-ROM mounted you may click on the PigCopy™ button to copy the file you are viewing in [PD Pig Out!™](#) to a selected folder on your drive.

Miscellaneous

If you have additional features you would like to see added to [PD Pig Out!™](#), please feel free to write or call us. We are interested in making the world of public domain and shareware easily understandable to the Macintosh public. Only by supporting these authors and sending in our shareware fees will this type of software distribution continue. Please be sure and pay for any shareware that you use. When we are dishonest with the author he becomes soured on the shareware market and either stops publishing or sells his products commercially . **Thanks again for supporting shareware and Public Domain authors!**
