≡ SINGLE ENVELOPE/MERGE.TEMP ≡ is a simple envelope template I cooked up to address a single print-merge #10 envelope. It may be easier to just type in the address and print it, but my secretary needed this additional incentive to be lured away from her typewriter.

This template is set up for a Personal LaserWriter (edge-fed envelopes). You may need to adjust the position of the address for your laser or another size envelope. …Oh — don't forget to select manual feed in the print dialog!

Instructions are included in a non printing paragraph within the template.

Hope you find it useful. Let's see some of your Word templates or style sheets or glosaries, etc. uploaded!
