### CHANGES SINCE VERSION 1.0

- 1) Optimized use of available memory.
- 2) Bug fixes
  - a) A player name that is longer than the width of the player boxes at the bottom of the display are truncated to fit properly.
  - b) Command key equivalents now activate their corresponding menu selections in the proper manner.
- 3) Shuffle Now. The deck may be reshuffled by selecting this item under the Options menu. It is not available while the playing of hands is in progress.
- 4) Dealer statistics. Available at any time under the Stats menu.
- 5) Player statistics. Available at any time under the Stats menu or by clicking on an active player's info box. Once the dialog appears, the << and >> buttons can be used (if there is more than one active player) to view the next player's stats. This eliminates the need to repeatedly close the dialog and select another player.
