MOUSE CRAPS 1.0
RELEASE NOTES

Welcome to **Mouse Craps**, the casino craps simulator for the Macintosh.

SYSTEM REQUIREMENTS

Mouse Craps was written, compiled and tested on a Macintosh Plus. Although I'm not positive, I believe that it should run on all flavors of the Mac (with the possible exception of the 128K Mac).

HISTORY

Mouse Craps was developed with **LightSpeed Pascal** (LSP)by **Think Technologies**, an excellent program from development of this type of program. I've wanted to write this program for a long time, but LSP was the first Mac compiler I've felt comfortable with. You may notice that the graphics and interface are a little raw. This is not the fault of LSP, but rather my own lack of knowledge of the Mac toolbox. I (by trial and error) was able to develop this program without any use of the **Inside Macintosh** books. I point this out not to sell you on my ingenuity, but as a plea for you to send in you're registration fee so that I may purchase these books. By the way, if you send me any of the volumes that I need (right now I need them all) I will register you. I'm sure that if I know more about the toolbox, I can produce a better program.

CAPABILITIES

Mouse Craps plays just like the casinos (I know, I live in Vegas). All bets are implemented except for place and buy bets (these will be implemented in a future version that is available only to registered users). All bets pay off in correct odds, and all odds bets are implemented. A final note on the capabilities, you can cancel bets that you have in your hand by clicking in the empty space between the normal play and hardways field.

REGISTRATION

Registration is the only way to get upgrades to this program. I will be fixing any problems with the current version, but no features will be added to the version I put on the electronic services. Registration fee is $15.00 and you many send it to:

> **William E. Seyler**
> **8 Cassidy**
> **Las Vegas, NV 89115**

By the way, you don't have to be a registered owner to report bugs. So if you find any leave me a note on GEnie, my address is W.SEYLER. HAPPY CRAPPING!!!
