

Welcome to Power Players!

Power Players is a game in which you and the other players control the future of seven energy companies! You control the creation, growth and ultimately, the existence, of these companies. See the rules for complete details.

Power players is designed to run on any Mac Plus or later running 6.0.4 or later. It will run in color on any system with a minimum of 256 colors; otherwise it will run in black and white.

Power Players is shareware. Thus, if you use and like this program, please send the programmer a little something to show that you liked the program and your interested in seeing more from him. I would suggest \$5 or \$10 if you can afford it, or perhaps a postcard if you are as broke as he is.

The source code is also available for \$15 (this includes the shareware fee). For the source code, please send a SASE and a disk (minimum 800K) with the payment.

Mail shareware payments and requests for source code to:

Greg Francis
8217 N. Whitehouse Dr.
Spokane, Wa. 99208

If sending a check for source code, please allow time for the check to clear before the author will ship the source code back to you.
