Notes About PICS Creator!:

-----

PICS Creator is a simple animation program created with SuperCard for use with the PICS Player screen saver module. If you do not have the PICS Player screen module, do not worry about any references to it. You can still use PICS Creator to create your own PICS files.

This is freeware but please register by sending me a note about yourself and how you are using this program. (I'm looking for recommendation letters for college and this would really be a great help. Thanks.)

Include your address and electronic addresses so that I can contact you about future products.

Thanks again,  
Adam Stein
