Current Versions

These are the version numbers of the software that I am running currently. (Though this is likely to change, sometimes on a day by day basis.)

TeleFinder:
User Manager 2.5 B7.cpt
Group Edition Host 2.5 B9.cpt
TeleFinder™ Pro 1.1 B10.cpt
TeleFinder™/User 2.5 B1.cpt

FirstClass:
FC User 1.672ß balloon.sit
FCInstall1.644ß.sit
FCServer1.644ß.sit
FirstClass Administrator

You might be asking yourself about now why he included this chapter?   This chapter is to show commitment on both companies (Spider Island, SoftArc) to listen to their users, implement needed changes, add wanted features and strive to have the best software in there category that there can be.

You will notice that all the versions above on the software needed to run the BBS is in Beta testing.   I don't consider this beta testing in the truest since of the word though because both of these companies have terrific release programs already and the above software is just the implementation of there users wishes.
