Note About TRW Consumer Procedure

In order to use this procedure you must:
1.) Be a subscriber to the TRW Credit Report Service
2.) Use Red Ryder 10.3 Telecommuncations Software
3.) Be somewhat familiar with how to work with compiling   procedures in Red Ryder.

I wrote this procedure with Red Ryder 10.3 telecommunications software to help my company retrieve TRW Consumer (personal) Credit Reports with our MacIntosh.

Without this procedure it's necessary to call TRW and while your online you must very carefully enter your password, person's name, address etc. along with a series of strange punctuation marks in exactly the right sequence or else you will get an input format error.

This procedure is my attempt to automate that sequence and make it possible for anyone to enter the appropriate data without having to follow a recipe to get the information in the right order. Through a series of prompting windows, you enter the criteria about the person, all while you are off-line. Then you will automatically be connected to the service and your report request will be done very quickly with no hassles.

It is ofcourse necessary for you to enter you own TRW local log on phone number (where I have 555-1234) and your account password information where I have listed:

TYPE RTS 12345678AB (Replace the 12345678AB with your Account Password)

You will also need to compile this file as a procedure before you can use it by

using the Compile Text file to Procedure Command.

I hope that you find this to be a time saver. Its helped my company run TRW Reports much faster.

I would welcome hearing from you through GE Mail
