# Sound Companion
## for HyperStudio

*"Sound Companion is a great addition to the HyperStudio users' tool kit."* Roger Wagner, President Roger Wagner Publishing

If you own HyperStudio, mPower or  Digital Chisel then you need to check out the new Sound Companion program.   Sound Companion is an easy to use, powerful sound editing tool for multimedia.   The program allows students and teachers to record and edit sounds directly on the computer

**Powerful Editing Options**
Sound Companion opens up many new possibilities when working with sounds on the computer.   With Sound Companion students can cut, copy and paste to re-arrange their audio files.   Using the program students can record their own voices and delete sections in the middle of a sound.

Sound Companion enables students to edit two or more sound files at the same time.   For instance, students can combine their own recorded voice with Martin Luther King's famous "I have a Dream" speech.   It could seem as if the student was advising Martin Luther King from the steps of the Lincoln Memorial.

The program allows students to mix sounds together to enhance audio quality, and students can apply audio effects to any sound file.    These effects include adding an echo to their voice, increasing the volume, changing the pitch, and making the audio play backwards.

**Exchanging Files Between Macintosh and Windows**
Have you ever wanted to exchange files between programs or between Macintosh and Windows computes? Sound Companion will help you solve this problem.    The program can open and edit virtually any sound file. It can also save a file in numerous sound formats including AIFF, WAVE and System 7 Sounds.   Using the program, you can share files between a Macintosh computer and a Windows PC.   Open a HyperStudio sound file on a Macintosh computer, and save the file in WAVE format onto a diskette.   The WAVE sound file is now ready for use in the Windows version of HyperStudio!

## Pricing

| | | |
|---|---|---|
| Single User   -   Macintosh or Windows 95 | | $49.95 |
| Lab Pack (5)   -   Macintosh or Windows 95 | | $149.95 |
| Site License (35)   -   Macintosh or Windows 95 | | $699.95 |
| Unlimited Site License    -   Macintosh or Windows 95 | | $799.95 |
