## 1.34 Michaela Pruess

She is the author of the great Version checker  
 VersCheck

.

She's the only one, who wrote an program to check the versions  
 of the system files. And that's specially for my Guides.

Michaela, thanks for the ability to distribute it with LibGuide.  
 Dear reader of this guide, with Michaela's program you are be  
 able to check your libraries easilier than before.  
 No more slow ARexx scripts. Now it's a full vbcc program.  
 Now it's also possible to check the correct versions of  
 PPC, WarpOS and AROS versions. (That's the first program which  
 will do that.)

Please respect the hard work of Michaela and download the complete  
 VersCheck archiv from Aminet. (util/cli/VersCheck.lha)  
 There you will find your special version from 68000-68060.

Here you can get some  
information

.

To Michaela: Many thanks, best wishes and kisses again ;-)
