1.1 "

 Hi everyone. This is the freeware version of GroovyPlayer, released for all of ↩
    you
Amiga folks. So don't feel uncomfortable if you copied it from a friend or you
got it through a warez channel ;-). I want to express here my gratitude for all
the guys and girls who registered (about 200 people). Your mails and your
encouragement was much appreciated (I spent the money on cookies and stuff :-).
The reason why I released this program is that I do not program any longer (well,
at least for an unknown period of time), and I didn't want it just to sit on my
harddrive. A lot of other things also happened to good old Alan in the meantime,
but I won't waste space here telling all about them. If you'd like to know more,
please mail me at "arpikata@elender.hu".

 If you click here, you can read the English documentation of GroovyPlayer
in AmigaGuide format, which will hopefully help you in mastering the tips and
tricks of usage.

                        Thanx for the kind mails and everything, indeed

                                        Alan
