## 1.5 xmb<xxx>.library

```
Name of the library : xmb<xxxx>.library

Description          : xmb<xxxx> is a set of libraries for handling
                    different message bases of BBS programs, so
                    it is possible to have one e.g. QWK door used
                    on all BBS systems. Now, library isn't finished
                    yet, but there is high possibility that it would
                    be, and we would like to preregister the name.
