1.2 Introduction to this door...

INTRODUCTION

This is a little door to view the file stats :))
It shows :

- * File ratio
 - * Byte ratio
 - * Uploaded bytes
 - * Downloaded bytes
 - * File credits
 - * Byte credits
 - * Time left on the BBS
 - * BBS name
-

- * Sysop name
- * Current Baud rate

1.3 Requirements...

REQUIREMENTS

- * Amiga ;-)
- * Kickstart 2.04+ / Workbench 2.0+
- * RexxMast
- * Excelsior! v1.20+ (I think...maybe even below v1.20)

I bought E! v1.20 from a friend of mine, and I want to be the registered one, instead of (still) my friend. I wrote some emails to Jay Britton (Amicom), I never got a reply about that I could get registered.... ;(((I want to have an update... but it can't untill I'm registered... maybe YOU can talk to Jay ?

1.4 Installation

INSTALLATION

Put this door where ever you want it....
You can put it in TEXT.WELCOME.USER.

Multiview/Amigaguide doesn't show the backslashes, so I have made a snapshot of it, so it can't go wrong !
The snapshot is called TEXT.WELCOME.USER.IFF it is also in the archive !

You can also put it in the normal doors area...
Simply install it, it's an Arexx script, that should do it ;))

Or put in maybe in a textfile when the users enters the Filebase. But maybe it gets irritating for the users if he sees it over and over again ;)) (if he quits the filebase, and enters it more then once)
The textfile command that shows itself when you enter the filebase can be found in the Excelsior! Manual.

1.5 BUGS! WAAHHH!! SPRAY THEM!!

BUGS

The worst of programming ;))
I haven't found any bugs, maybe you find one... then you can report it to
me.

1.6 The Future and beyond!

THE FUTURE

The next File! Stats will be COMPLETELY different.
The next version will use the whole screen, so that one
should be nice for the TEXT.WELCOME.USER file.

1.7 E! Sites

I was using FTP, checked out some sites, when I entered the "Graphic BBS"
I was browsing through the directory's when I saw E! dirs!!!
Updates,doors,utils.. you name it!!
I also found out that the whole filebase was running under Excelsior!

Here's the ftp site : ftp.graphics.rent.com
www site : http://www.graphics.com

Also check out the Excelsior! Homepage for news
and stuff : http://www.dreamscape.com/jbritton
