ALTSYS

...the advanced PostScript language design & production program for NEXTSTEP™

Virtuoso 2.0 is an advanced PostScript illustration and design production program developed by Altsys Corp. While developing award-winning programs such as Fontographer and Aldus FreeHand, Altsys has learned what you demand most from a drawing program; speed, ease-of-use, and an advanced feature set so you can get the job done quickly, easily, and professionally. Exclusively marketed, distributed and supported by GS Corporation, Virtuoso 2.0 provides the drawing, organization and text handling capabilities to satisfy the most discriminating design needs in one easy-to-master program. It is the perfect solution for the creation of:

- Advertising layouts
- Brochures
- Technical illustrations
- Professional newsletters
- Infographics
- Product packaging
- Fine art
- Caricatures
- Specification sheets
- Presentation materials
- Posters
- Logos
- Graphic drawings
- Multimedia renderings
- and much more...

Virtuoso 2.0's feature-set includes multi-page capability, freestyle drawing tools, autotracing of scanned images, color and layer management and the capability to produce color separations on the desktop.

Virtuoso 2.0 exploits NEXTSTEP's built-in Display PostScript, Pantone color Libraries, drag and drop and spell checking capabilities and support for filter services to deliver professional results.

With Virtuoso 2.0 you can open and edit Virtuoso 2 EPS files, simplify the creation of paths and unique shapes. Furthermore Virtuoso 2.0 now provides full compatibility with FreeHand documents. Open FreeHand documents in Virtuoso 2 or open Virtuoso documents in FreeHand 4.

Virtuoso has been acknowledged by Publish and NeXTWORLD Magazines, as the best design and illustration for program for the desktop. Combined with Collaggi Palette and the power of the NEXTSTEP environment, Virtuoso 2.0 is the ultimate professional graphics solution available today.
