RDR Software Group is a wholly-owned subsidiary of RDR, Inc. headquartered in Fairfax, VA. RDR specializes in system engineering and integration, software development, training, and commercial product development for the NEXTSTEP software environment.

Consulting

RDR has a large staff of experienced NEXTSTEP developers who have helped both government and commercial clients develop their mission-critical applications using NEXTSTEP's powerful object-oriented technology. RDR's experience is in system analysis and design, prototype development, application development and integration into existing client environments.

Training

RDR has been an authorized educational partner of NeXT for several years providing a

broad range of NEXTSTEP classes for government and commercial clients of all experience levels. RDR has provided students with the skills and hands-on experience to become productive NEXTSTEP developers, system administrators and end-users. Classes can be held either on-site or in RDR's training facility in Fairfax, VA. Please call for a class schedule and course catalog.

Product Development

In addition to @image network presentation graphics, RDR Software Group has developed a palette of objects called PowerPalettes™. PowerPalettes is a family of four objects: RDRGadgets, RDRImageView, RDRSelector and RDRSwitchView, that enhance the capabilities of NEXTSTEP's Interface Builder. Programmers who have used these reuseable software components have found them to be necessary tools in saving development time and cost. RDR has been shipping PowerPalettes since January of 1992.
