The following is a list of Nintendo 3DS games and experiences that are available at Nintendo's booth at the 2010 E³ Expo. The games represent some of the industry's most beloved franchises blended with visuals and experiences that take players literally deeper into the game.

Playable Games

The following titles are in development for the upcoming portable Nintendo 3DS system. E³ Expo attendees will be given the opportunity to sample actual game play and experience firsthand what the games will look and feel like as well as how they have changed.

nintendogs™ + cats

- The adorable puppies of *Nintendogs* come to life in the palm of your hand on the Nintendo 3DS system with even cuter and more expressive puppies. The interaction between puppy and player also goes beyond the screens to draw players in like never before.
- *Nintendogs* uses the built-in camera and facial-recognition technology to enable puppies to react to your real-life movements, mimicking your head tilts and jumping up to lick you as you lean in.
- The 3D visuals and the deep interaction offered by the touch screen, microphone and camera of the Nintendo 3DS system make for a deeper emotional connection to your puppies, giving players even greater joy from an already heartwarming experience.
- Everything that made the original *Nintendogs* great also returns, with multiple breeds to choose from, accessories for your puppies to wear and the ability to let your puppy train and compete in different challenges and activities.
- The game will also introduce cats to the series for the first time.

Steel Diver™

- *Steel Diver* is a new submarine action-simulation game from Nintendo that uses touch-screen control to guide submarines through lush, undersea 3D environments.
- Players will manipulate switches and levers on the touch screen to control their sub's speed, depth, pitch and torpedoes. Branching paths, split-second decisions and attacks from enemy ships make for a thrilling undersea adventure with unique touch controls.
- Graphically, the 3D in *Steel Diver* makes it feel like you are peering into an aquarium, with the action unfolding before your eyes.

NINTENDO 3DS™

PilotWings Resort™

- Nintendo returns to air sports, this time at Wuhu Island – the setting for *Wii Sports™ Resort* and *Wii Fit™ Plus*. You can soar through the skies over the familiar island in a hang glider, jet pack or airplane, each with its own unique controls, its own distinct feel of flight and its own new game play in 3D.
- *PilotWings Resort* offers a wealth of activities, challenges and game play for gamers of all tastes, whether you want to be soaring leisurely in the skies over Wuhu Island or flying competitively based on time and points.
- *PilotWings Resort* features a breadth and depth of field that can only be achieved with the 3D effects of the Nintendo 3DS system, offering a feel and style of play never before seen in a flight game.

Star Fox 64™ 3D

- The *Star Fox* team triumphantly returns to one of its greatest missions with the remake of *Star Fox 64* in full 3D.
- The entire *Star Fox* universe spreads out realistically into the depths of the Nintendo 3DS screen. The 3D visuals give players a clearer grasp of distance and position, making the game more approachable and intuitive for players to focus on the action.
- *Star Fox 64 3D* also puts the two screens of Nintendo 3DS to use, with the top screen featuring the 3D game play.

NINTENDO 3DS™

Demonstration Mode Games

The following games are also in development for the Nintendo 3DS system but are not yet playable. On the show floor, people are able to watch demos of the games and the ways in which these great franchises will incorporate the groundbreaking Nintendo 3DS visual technology.

Kid Icarus™: Uprising

- One of the most longed-for franchises from Nintendo's long history makes its glorious return in spectacular 3D. *Kid Icarus* is back in a new game designed specifically for the Nintendo 3DS system by *Kirby™* and *Super Smash Bros.™* creator Masahiro Sakurai and his development team at Project Sora.
- *Kid Icarus: Uprising* is a fast-paced and action-packed blend of aerial and ground-based shooting built on elegantly intuitive and streamlined play control. Boasting game play that is easy to pick up but incredibly deep, the game is sure to satisfy novice gamers as well as fans who have been clamoring for a new installment in the franchise.
- The hero, Pit, teams up with Palutena, the goddess of light, who bestows on him the miracle of flight for limited stretches. With this gift, Pit soars through skies, shooting down swarms of enemies along the way, before finally setting down and engaging in frantic ground-based battles against Medusa's underworld army.
- *Kid Icarus* was originally released for the Nintendo Entertainment System™ in 1987.

NINTENDO 3DS™

Animal Crossing™

- The world of *Animal Crossing* comes to life on the Nintendo 3DS system, complete with new game play and a new graphical look that, together with 3D visuals, breathe new life into the already living, breathing world of *Animal Crossing*.
- In *Animal Crossing*, players move out on their own to live a life of ease in a village of walking, talking animals. But this time around, unexpected circumstances suddenly put the player in the role of Mayor in a town they've only just arrived in. With the help of the many unique townsfolk and one eager secretary, players will enjoy making their new town a better place for all to live in.
- *Animal Crossing* will also take advantage of the enhanced wireless functionality of the Nintendo 3DS system.

NINTENDO 3DS™

Mario Kart™

- Mario and friends will be shooting shells, splashing ink and throwing banana peels across the screen when *Mario Kart* races onto the Nintendo 3DS system. This *Mario Kart* game will deliver dynamically thrilling races with the 3D visuals of the Nintendo 3DS system.
- The game will also offer players a robust selection of connectivity options, including ghost data exchange and expanded local and wireless multiplayer options. Players will be able to race with friends and others from all over the world.
