

# VLT POKER - MARKETING PLAN

VLT POKER is not only an entertaining game, but it also is part of an interesting marketing opportunity. Here's how it works.

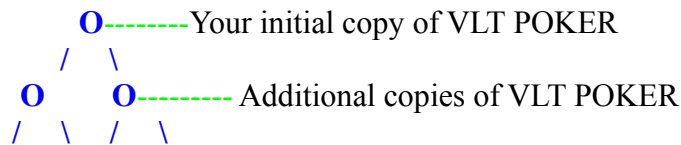

Register your VLT POKER today and pay just \$12 for the additional features and documentation. With that purchase you have secured your position as a representative of the software.

Typically when you purchase a good product, you tell your friends about the product and its features. For example, you may tell a friend about a particular type of car you purchased. They proceeded to test drive your car and eventually buy a similar one for themselves. This sales process occurs with many products, every day. In fact, word-of-mouth advertising sells more products than any other marketing format. However, when your friends purchase the products you advocate, you do not receive any commissions or rewards; you are never paid for the advertising you do. We would like to pay you for telling your acquaintances about your experiences with our product, VLT POKER

There are many high cost network marketing schemes available today and our intent is to allow people a lower cost alternative in experimenting with the network marketing format. More and more products are sold this way and the future will likely see a tremendous transition to this type of organization. We hope that you participate with us, learn a little about network marketing and perhaps try it on your own one day.

Once you have registered your copy of VLT POKER, we will pay you a commission for any additional copies that you sell or for which you influence the sale. You have influenced a sale when one of the people who have bought VLT POKER from you, sells a product. In fact, you are considered to have influenced any sale that occurs below you in your tree of sales.

We have employed a bilateral multilevel marketing approach for VLT POKER. This means that each copy sold has two associated "legs".

Payout is determined by the level you attain. The level is determined by the number of sales you have influenced. Every time you complete a new level you will earn 6 credits. In order to complete the first level you need to have two new copies sold. To satisfy this requirement, you may either sell two copies yourself or sell one copy and have the purchaser of that copy sell an additional copy. Then, every time the number of new copies sold doubles, you will be paid another 6 credits. That is, you will earn another 6 credits when four more copies are sold below you. Then eight more copies must be sold to earn another 6 credits. You continue to benefit from the work of others, forever. Every time you achieve 12 credits we will send you a cheque for \$12.00. Only six registrants are required for you to earn the purchase price of VLT POKER

(two at the first level and four at level two).

There are several advantages of marketing in this format. First, you continue to benefit from the work of the individuals who have purchased directly from you or from anyone below you. Also, when people above you sell copies, the commission is placed at the end of one of their lines so you can benefit from those sales if a registrant is placed in one of your lines. (The sales are placed in the highest possible position.) Products are sold all over the world using network marketing. It is an effective and low cost method of promoting almost any type of product. We understand that this plan does not present the high earning potential of some others, but the game is low-cost and fun. Who knows, maybe you will acquire the knowledge to one day try a network marketing plan of your own. (if you haven't already)

Good luck and **REGISTER TODAY!!**
