

GRPFind

Searching through the group (GRP) files.

Searching for program

Type the name of the lost program (or just a part of the name) and GRPFind will search through groups. The group that contains this string will open on the screen.

Opening all groups

Search for one widely used character (like "a") and all the groups will open.

Closing all groups

Before searching for the character, check the *Minimize found groups* box. The program will close all groups.
