## WELCOME

Welcome to *PC Advisor's* June 2007 DVD - with a complete desktop planetarium and a fantastic guide to migrating from XP to Vista.

There are several other full free programs on the disc, and a collection of games demos for your perusal. Scroll through the PDF for details and follow the links to register when necessary.

Any comments are welcome - contact me via [richard\\_clooke@idg.co.uk](mailto:richard_clooke@idg.co.uk)

Richard Clooke  
 Cover Disc Editor

## ON THE CD

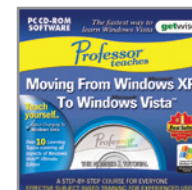

### Redshift 5.1

RedShift contains everything that the amateur or experienced astronomy enthusiast needs to explore the heavens. This powerful software will turn your desktop into the ultimate planetarium.

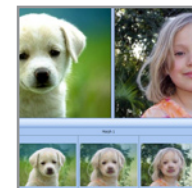

### Professor Teaches Windows Vista

As with all new versions of Windows, there is always a steep learning curve - even more so with Vista than previous versions and much time is wasted trying to figure out the new way of doing things.

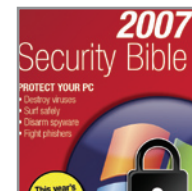

### Photo Morpher Lite

This easy-to-use picture-morphing software transforms one person or object into another before your eyes. Shock your friends and family, post your creations on sites such as MySpace and YouTube, or email them to your colleagues.

### How-to, helpline and security apps

A collection of freeware, shareware, trials and links to useful applications online. There are also three videos for the new release from EA Games - Battlefield 2142: Northern Strike.

## RedShift 5.1

Would you like to examine Mars' surface in detail, or take in the view of Earth from Venus? Do you long to see beyond our galaxy into deep space? RedShift 5.0 contains everything that the amateur or experienced astronomy enthusiast needs to explore the heavens. This easy-to-use, powerful software will turn your desktop into the ultimate planetarium.

### Key features

- Astronomical Record Breakers and Photo Gallery
- Complete Hipparcos and Tycho-2 stellar catalogues
- Travel through time from 4173 BC to 9999 AD
- Observe from any point on Earth or the solar system
- Capture voyages in space with the movie recorder
- High precision Sky Diary to plan your observations
- Track thousands of satellites, asteroids and comets
- Catalogues of optically visible open clusters
- Includes variable stars and quasi-stellar objects
- Catalogue of 50,000 asteroids from Bowel Database
- Images from the Caldwell catalogue
- Revised high-resolution maps of planets
- All recently discovered moons
- Displays of Solar corona with total eclipse events
- Night vision option – screen dimming and reddening
- Macro-player to view guided tours of space
- Quick setup of the sky view with Open GL

## Professor Teaches Moving from XP to Vista

Professor Teaches is the World's #1 selling range of award-winning training packages for leading Microsoft applications.

As with all new versions of Windows, there is always a steep learning curve - even more so with Vista than previous versions and much time is wasted trying to figure out the new way of doing things.

This tutorial aims to smooth the path to Vista by giving a gentle introduction on how to get started with Vista.

A great product to help users learn the basics of moving from XP to Vista. With over 10 learning topics it will guide you step-by-step through the basics providing simulations for you to try as you go.

Welcome Screen & Welcome Centre  
Explore the Desktop  
Work with the re-designed start menu  
Discover 'Explorer Windows'  
Learn how Vista is designed to help users manage files and folders  
How to search for files  
Explore the control panel and the different ways to change the state of the computer

## Morpheus Photo Morpher Lite

This easy-to-use picture-morphing software transforms one person or object into another before your eyes. Shock your friends and family, post your creations on sites such as MySpace and YouTube, or email them to your colleagues.

You can create an unlimited number of morphs, from any two photos and share morphs with the built-in Share AnimationT email feature. Users can also render morphs in a variety of popular formats, including Animated GIF, and preview morphs as you create them within the application.

## Upgrade offer

From Lite to Standard:

- Morph an unlimited number of pictures and save animations as Flash SWF files for use on the web
- Export morph frames as Jpeg, PNG, Tiff files and more, and view a timeline window

Or upgrade from Lite to Pro:

- Customise the interface, including toolbars and window tabs and personalise windows with a variety of skins to choose from
- Connect dots and better adjust triangle setup with line tools and enjoy AVI output for use with third-party movie software

Click below to visit the upgrade website

<http://tinyurl.com/2wnng4>

### Installation details

Click on the link below, or go to Start, Run. Type  
D:\full\dekart\prvdisk.exe

### System requirements

166MHz Pentium PC; Windows 95/98/NT4.0/2000/ME/XP  
16MB RAM; 2MB hard disk space  
Windows 95/98/ME supports up to 2GB of encrypted space  
Windows NT/2000/XP supports up to 1000GB

#### NT users

Disk size can be 1Tb maximum. Disk File-Image should not be more then 4Gb on Fat32. Fat32 file system does not support large files(up to 2Gb). You are required to use NTFS. Virtual encrypted disks can be created only by NT Administrator. In order to work with the application as a User, the initial use of Dekart. Private Disk must be done by the Administrator.

Click to visit the Google SketchUp website  
<http://www.dekart.com>

## Dekart Private Disk 2.04

Dekart Private Disk creates virtual drives on your hard disk or storage device, in which it places your sensitive data and protects it from unauthorised access with 256bit AES encryption.

It is easy to create a new virtual Private Disk to encrypt and store your sensitive data, and you can even backup the encryption key as an extra safeguard.

Once a virtual encrypted drive is created, that drive is assigned a letter and appears to the user in the same way that any other drive would. When the disk is mounted, data is automatically encrypted and decrypted as the user writes to or reads a file.

There is virtually no performance hit while Private Disk is in use, and when it is unmounted the secure data becomes completely unreadable by Windows.

## Sowsoft Effective File Search v4.2

Effective File Search (EFS) is a powerful but easy to use search tool. Search any files on your computer or local network. Search in folders or results. Support of all popular file formats (MS Office files, PDF, RTF, HTML and many other text and binary files).

Search filters include date and size, containing text or hexadecimal codes. You may use Boolean operators to perform multiple keyword searches. All results and parameters can be saved to file. Other features include export, Windows Explorer functionality (icons, context menus, drag and drop) and file operations (copy, rename, delete etc.).

## Installation details

Click on the link below, or go to Start, Run. Type  
D:\full\sowsoft\efs42full\efsearch-setup.exe

## System requirements

Pentium 133MHz; Windows 95/98/2000/NT/XP;  
32MB RAM; 10MB hard disk space

### Registration note:

Run EFSearch-setup.exe to install EFS.  
Run Register.exe to register EFS.

Click to visit the Sowsoft website

## Sowsoft Active System Locker v.3

System Locker is a handy utility that allows you to protect your personal computer from unauthorized access. You can use System Locker to restrict access to your PC. It is attractive, secure, and very easy to use. It starts automatically with Windows and optionally locks your desktop upon loading. It hides your desktop on system lock and provides an informative message to other users. You can set start/stop times for users to limit their access to your PC. Any action performed by System Locker is optionally recorded to log file and accompanied with sound.

Main features of System Locker: secure mouse and keyboard input blocking, powerful startup and automation options, audit and scheduling features, resistance to brute-force password hacking, sound support, taskbar icon notification.

## Dynmark e-txt 5.2

Dynmark's e-txt message manager 5.2 is a PC-based application similar in appearance to most popular email programs, but designed for the sending and receiving of text messages. With the ability to publish and maintain mobile content, send and receive SMS messages from a range of APIs, web-based applications or Microsoft Windows PC applications – e-txt is a fully comprehensive text-messaging tool for businesses and organisations of all sizes.

Special tools include SMS-email and email-SMS capabilities, so you can text from your usual email account, wherever you happen to be, set sender IDs, schedule messages to be set, set validity periods so messages won't be sent after a certain time, and much more.

**e-txt™**  
msg manager

### Upgrade offer

If you're a Carphone Warehouse customer, visit [www.cpwessaging.co.uk](http://www.cpwessaging.co.uk) and for £50 you'll get 500 text messages AND a dedicated inbound long number for your own customers to text you on, with new messages arriving straight to your PC desktop!

Alternatively, visit [www.e-txt.com](http://www.e-txt.com) to purchase your own personalised keyword on a short-code, get dedicated inbound long numbers, or top up your message credits.

## Pure Motion Edit Studio 4.0

Editstudio 4 is an incredibly flexible and powerful video editing program.

Capture video, edit it in any way that you want and create a movie exactly the way you want it. Editstudio supports advanced features like keyframe editing, unlimited composition layers, picture placement, and many text and special effects.

This version is fully functional, allowing unlimited layers and the import/export of many popular video formats. Also included is a demo (watermarked) version of our MPEG XS product, which allows MPEG video to be imported and exported - ready for making a DVD. If you wish to buy the full version of MPEG XS, use the upgrade offer to buy Editstudio 5 which includes the full MPEG XS.

### Upgrade offer

EditStudio 5.0 offers more advanced features, including audio effects, three-point colour correction and will automatically add or remove space as items are moved around. Plus, the full version of Mpeg XS is included, allowing Mpeg video to be imported and exported at full quality.

Click below to visit the upgrade website

## Boiled Sweets KeePeeUppy

KeyPeeUppy is a totally free, addictive yet fun game for all the family. The object of the game is simply to keep the ball off the ground. Unlike other similar games KeePeeUppy features a 3D ball and realistic physics engine so it feels like you are actually playing with a real football (either a standard ball or a World Cup 2006 style ball). Play in various locations, including deep in a rain forest, in an ancient stone circle or down by the lake.

There are two modes of play, basic and enhanced. In basic mode it's just you and the ball. Nice and easy. In enhanced mode there are additional distractions, namely yellow and red cards plus the dreaded black cat! You can also compete with players from all over the world!

So what are you waiting for start getting in practise for Euro 2008 and the next World Cup.

KeePeeUppy is 100% freeware! Please feel free to share this software with your family and friends. If you enjoyed playing KeePeeUppy and want to show your appreciation then you are welcome to make a donation. Every donation, however small enables the developers to continue to develop software.

To make a donation visit :

# OpenOffice.org 2

## OpenOffice.org 2.1

OpenOffice.org is an open-source multiplatform and multilingual office suite. Compatible with all other major productivity suites, the product is free to download, use, and distribute.

OpenOffice.org 2.1 is recommended for all users, as it represents a significant improvement over all previous versions. Among other things:

- \* Multiple monitor support for Impress
- \* Improved Calc HTML export
- \* Enhanced Access support for Base
- \* Even more languages
- \* Automatic notification of updates

**Click here for full system requirements**

### **NOTICE OF TRIAL SOFTWARE**

Readers who have previously installed the Beta software will need to uninstall this code and ensure that all of your documents have been saved as Microsoft Office 97-2003 documents.

Click to visit the Microsoft website

<http://www.microsoft.com>

## **Microsoft Office Professional 2007**

It is highly recommended that you evaluate your computer before installing the 2007 Microsoft Office system to verify your computer meets or exceeds the minimum system requirements.

The 2007 Microsoft Office system runs on Microsoft Windows XP (with SP2), Windows Server 2003 (with SP1) and later operating systems. It is supported on Windows Vista Beta 2 (when available), and not earlier versions of Windows Vista. The 2007 Microsoft Office system client is a 32bit application and runs on a Windows 64bit platform (Windows XP and Windows Server 2003) via WOW64.

Due to changes in the file format, Microsoft Office Professional 2007 cannot open documents created using Microsoft Office Professional Plus 2007 Beta.

### **IMPORTANT**

The software within this demo disc (the 'Software') is licensed to you solely under the terms of the licence agreement, (the 'Licence Agreement'). By installing or otherwise using the Software, you indicate your acceptance of the Licensing Agreement. If you do not accept the Licence Agreement, you are not authorised to install or otherwise use the Software.

It is strongly recommended that you back up your data before you install and run this software. Expiration date 60 days after installation.

### **Steganos Safe 2007 trial**

After installation, click on the 'Request evaluation serial number...' link, and enter your email address in the box. On the next page the serial number is displayed. Back on the Steganos Safe welcome screen, click on 'Enter serial number...' and the serial number from the website is automatically entered in the space provided. After that its plain sailing! You do not need to complete the download offered by the registration process as the software is here on the cover disc.
