Bend Sideways

The Bend Sideways filter will place your artwork along an arch that's bent the greatest distance in the middle.   This can be used for cool titling effects.

The amount slide will vary from -200% to 200%.   Positive values will bend the shape to the left, while negative values will bend it to the right.   At 100%, the shape will be expanded 100% of its middle width.   Values in the range of -25% to 25% probably will work best.
