

This document contains details available after the manual was printed.

If Mimic does not work, try the following:

If you use System 6, turn on Single Finder.

If you have many INITs, remove them and restart XPress. If no longer problem, put them back one by one to see which one is in conflict with Mimic.

Fixed in Mimic 1.01, previous version 1.00.

In certain configurations Mimic freezed when the mimic palette was opened followed by a click in the menu bar. Fixed.

In certain situations Mimic freezed when no document was open and you clicked in the Mimic button. Fixed.

Mimic 1.10, previous version 1.01.

Mimic adapted to Quark XPress 3.1. Mimic 1.10 does not work with XPress 3.0.

Option-tab (new in XPress 3.1) may act as a separator and will work as any other tab.

Mimic will mimic blend color fills.

Bug which freezed program when doing Mimic followed by Item + Duplicate or Item + Delete. Fixed.
