Don't Panic!

Yo, hi there.   How's life, the universe, and everything around your part of the world?
Here is some info about this program that you don't really need to know.... I programmed it in ZBasic <gag, choke, cough> on a Mac IIci and PB 180.   Now that I have completed this program I don't want to ever write anything worth distributing in Basic again.   (It took much more pain and inconvenience than it was worth.) So don't expect version 2.0 for quite a while. That's because I'm switching over to writing everything in Pascal or something better. Anyway, here it is and I hope you like it.
