General Educational Information
///////////////////////////////

Student Financial Aid page
http://www.cs.cmu.edu:800/afs/cs/user/mkant/Public/FinAid/finaid.html

If you thought getting financial aid was hard - try typing in this URL!
Loads of info on Student Aid and related programs and funding. A very
worth while stop for any student or parent of student. Includes info
on special grants and minority funding and links to various financial
aid offices. Very informative resource.

Web Site for Educators, Students, Scientists & Engineers
http://www.thomson.com
gopher://gopher.thomson.com
FTP to: ftp.thomson.com   (contains the file archives only)

You can also send email to: <search@catalog.thomson.com> to perform a
catalog search of the files in the archive.

The new Internet site includes a searchable database of more than 20,000
education, reference, scholarly, scientific, technical and business
products, as well as discipline-specific Resource Centers, electronic
discussion and newsletter lists, and on-line supplements to products.
The number of products will continually increase to an estimated 50,000
within the next twelve months.   Users have intuitive and powerful
search capabilities that give them immediate access to a wealth of
information and resources across a wide variety of academic, scientific,
technical, reference and business disciplines.   On-line order forms
enable users to immediately place orders for ITP texts, journals and
electronic products (video, software and CD-ROM).

Science Education Home Page
http://www.macropress.com/science/

Macro Press is a company of active mentor teachers who got tired   of
waiting for an integrated curriculum science program that would work in
their classrooms within available budget and resources. They ended up
writing their own materials and paid to publish them (K-6). Their students
are now winning national awards because the students are learning hands on
practical science and sharing that knowledge through the World Wide Web!

Houghton Mifflin WWW Page
http://www.hmco.com/

Houghton Mifflin's new Web site offers something for everyone; an education
center for elementary and secondary educators; resources and services for
college faculty; and an online bookstore for booklovers, bookstore owners
and Internet explorers of all types. Houghton Mifflin is a leading publisher
of textbooks, instructional technology, assessments, and other educational
materials for the elementary and secondary school and college markets, as
well as an extensive line of reference publications This publisher also has
many fiction and nonfiction books for adults and young readers.

College Pages
http://www.mit.edu:8001/people/cdemello/univ.html

The folks at MIT (Massachusetts Institutue of Technology) have assembled
what is definitely the most complete fully linked list of college and
University home pages all across the WWW. Over 750 sites and still adding
more almost daily. If you need to check out info on a college or Univ. then
here is the place to start. A fantasticly useful and well done resource.

Stephanie DaSilva's List of Lists
ftp to: rtfm.mit.edu
located in --> /pub/usenet/news.answers/mail/mailing-lists

Complete set of lists (that's right every mailing list known) along with
descriptions for each list. The list of lists is a good way to see if
there is a mailing list that coincides with your interests. Also included
are directions on how to join each mailing list or listserv. Make sure
you look at your mail each day or it can become quickly over-run. Some
popular mailing lists generate hundreds of email messages weekly. Make
sure you read how to "un-join" or cancel yourself from a mailing list.

Distance Education on the Internet WWW page
http://www.crl.com/~gorgon/distance.html

Thomas Copley has made this web page available to the public and it is a
complete and well compiled list of resources on distance learning. It has
numerous links and info on many aspects, topics and questions related to
distance learning. Consider this a prime resource for the subject.

The British Council World Wide Web
http://www.open.gov.uk/bc/bcchom01.html

The British Council promotes educational, cultural and technical
cooperation between Britain and other countries. The Council is designed
to establish long-term and worldwide partnerships and to improve both
international dialog and the understanding of diiferent cultures found
world-wide. The site is under development. It will provide comprehensive
information about the British Council services worldwide, and will also
provide a single point of access to relevant British resources.

Multimedia File Formats on the Internet - a Beginner's Guide
http://ac.dal.ca/~dong/contents.html

An extensive multimedia guide for novice Internet users. It explains the
file formats for texts, compressed files, games, software, pictures, sound
and music, movies, foreign languages, etc. It also explains the ways to
identify the different files and how to download and use the files. There
are   many pointers within the guide that you can use to download the files.
This info is mostly for PC users but some of the information is essential
even for Mac users and is general enough to be of importance for all users.

Kaplan Interactive
http://www.kaplan.com

Yes this is a commercial service but it still is a wealth of help and info
for anyone in need of passing that big test coming up. SAT, GRE, LSAT,
MCAT, USMLE, DAT, and more are included here. This is a division of Kaplan
Educational Centers and basically offers the same services as the Centers
except in an online "interactive" learning environment. It's exam time...

The Princeton Review
http://www.review.com

Another (and sometimes better) test preparatory service that also offers
in depth info on coolege and graduate admissions, registration, career
opportunities, standardized tests, SAT, GRE, LSAT, MCAT, USMLE and DAT
with lonks to college web pages and other web pages that offer information
and help on a wide range of testing and admissions policies and info. Also
has an extensive colection of The Princeton Review's student oriented
publications and diverse offerings of mail lists for each standardized test
that The Princeton Review supports (and that's a lot of tests!)

Educators are qualified to receive Syllabus magazine 9 times per year
FREE!*

Syllabus -The Definitive Technology Magazine for Colleges, Universities,
and High Schools.

Nobody covers technology in education like Syllabus. Nine times a year,
from September through June, Syllabus bring you a wealth of information,
including valuable tips on multimedia, the Internet, distance education,
quantitative tools, products, and educational discounts. Learn what
different educators, researchers, and institutions are doing with a
variety of technologies such as computers, video, telecommunications,
and multimedia.

In 1995-96   Syllabus will have special feature issues. The topics include
software products for the curriculum; multimedia; the Internet; education;
telecommunications and video and presentation technologies. Also, don't
miss our special supplements such as Windows on Campus and our discipline
specific editions such as Computer Science, Engineering, Science and
Medicine.

Syllabus is a free service to the education community. If you work in an
educational institution, you are qualified to have Syllabus delivered free
to your home or office, nine times a year.   To ensure that you don't miss
an issue, please completely fill out the form below.
