

Welcome to the Quicknames Pro 2.0e "Test Drive" kit.

You should have received:

- * This read me (and a Macintosh version)
- * Quicknames Pro 2.0e Test Drive ("qnpro_td.pkg")
- * Quicknames Pro 2.0e help package ("qnhelp.pkg")
- * Order Form with contact information. ("order.txt")

First of all we want to thank you for trying out Quicknames Pro. We are committed to continually improving this product and have lots of exciting things planned.

Secondly, Quicknames Pro has been tested with a number of applications and operating environments. If you experience any difficulties with this demo please don't hesitate to contact us directly.

After installing Quicknames Pro simply tap on the upper half of the built-in names button to launch it as seen below:

We especially welcome your feedback so if there are new features that you would like us to consider, current features you don't like or just general comments please feel free to contact us.

Quicknames Pro provides a faster and more flexible environment for accessing your name file and we are confident it will significantly streamline the way you use your Newton.

In order to get the most benefit from this demo we recommend you install and read the on-line help.

We also recommend that you tap the "Remove prefs from Newton" button (in the Quicknames preferences area) before you remove Quicknames Pro.

Below are a few notes concerning this version.

DISABLED FEATURES

LandWare would like you to be able to use this demo to *fully* evaluate Quicknames Pro. Therefore this version is equal to the full version in every way except:

1. The "a", "i", "o" and "option" keys have been disabled
2. You cannot directly manipulate the text in the search field
(Note-- in the full version ****you can:**** drag text, write/scrub, double-tap for a keyboard or even use Palm's Graffiti.)
3. The Auto search feature has been disabled.
(This feature allows you to automatically search for any highlighted text.)

4. You cannot search for a first name.

We are confident that enough functionality has been maintained to enable you to fully evaluate Quicknames Pro and (hopefully) become convinced to purchase the full version.

INDEX BUILDING TIMES

The very first time you launch Quicknames Pro it will spend time building its search indexes. Building indexes can take some time so we suggest that if you have over 400 names that you have your Newton plugged in while the indexes are being built.

To give you an idea of how long it can take we have provided a table of build times below.

Index building times for a Newton MP110 (with 4Mb Flash Card)

# Names	Build time (min)
200	1:00
500	2:48
750	6:10
1000	7:32
1500	11:00
2000	Make a cup of coffee

These times are approximate and your mileage may vary. If you are running low on space then index building times can take CONSIDERABLY longer.

The good news is that it is a one time operation. And the index created with this demo version will be used by the full version.

SEARCHING FOR FOREIGN CHARACTERS

No we are not talking about finding a overseas person with a good personality!

Even though Quicknames allows you to enter foreign characters version 1.x of the Newton operating system considers o, o umlaut or a, a accent etc lexically equivalent.

COMPATIBILITY WITH OTHER NAME APPS

As far as we can tell Quicknames Pro 2.0e coexists with Action Names, More Info and PowerNames.

Action names and More Info do not overlap Quicknames functionality and we feel that the combination of Quicknames Pro and the latter would provide you with an extremely powerful names management environment.

There are a number of shareware applications that alter the way the names file operates and we cannot guarantee compatibility with all of them.

Again feel free to contact us if you are having a particular problem.

COPYRIGHT AND DISTRIBUTION

Please feel free to distribute the test drive edition of Quicknames Pro which is clearly marked Test Drive. Please ensure you distribute the entire test drive package unaltered.

Please remember that Quicknames Pro is a commercial product and is protected by strict copyright laws. Any unauthorized reproduction or distribution of the full version is strictly forbidden!

Enjoy!
