METER v1.0b © 1993-95 B. Jaques — bjaques@wimsey.com
3 - 5516 Dalhousie Rd., Vancouver, BC, CANADA V6T 1W4

Use this software at your own risk. Comments and bug reports welcome!

Use METER to:
• Record work-time in programs, documents, projects, and tasks
• Bill for your time and services
• Log shareware fee requests for later consideration
• Display and organize records from any calendar period
• Export data to spreadsheets and word processors
• Print or save formatted reports

Access METER anytime from the system menubar. Balloon Help and on-line user's manual are available in the METER control panel.

This control panel may be distributed freely. No other files need accompany it.

About he emo

You can try out METER as a time-limited demo. It will collect 14 days of data and print 7 pages of records. To start a new demo period, just remove 'METER Data' from your Preferences folder and restart.

For a full-featured, time-unlimited version, send $20 to the address above. Options: $5 per additional Mac; $5 (per quarter) for quarterly updates; $5 for quick-reference guide. Network version under development (price not yet fixed).

METER includes Club hare, a voluntary "pay-per-use" shareware system that represents the future of software distribution. You pay only for the products and services that you use, and only as much as they're worth to you. Payment is voluntary, with incentives offered by software authors for paying customers: unlocked features, upgrades, new products, documentation, technical support, etc.

Installing ETER   Fig.3

Just drag it onto your System Folder (it goes in your Control Panels folder) and restart.

You can shut down or restart METER at any time by clicking on the METER icon at the upper left corner of the control panel window. If you just want to deactivate METER for

awhile, without removing it from active memory, choose 'METER off' from the METER menu.
