

Reports

In addition to the sitter information report, you can also print reports from the Baby sitter and Children windows.

If the Baby sitter window is active you can click the Print icon or select the Print item from the File menu to print a list of baby sitters with the information on each one.

If the Children window is active, you can print report for the currently displayed child which includes all the information in the window.

Each report uses the default font.

Check the information for accuracy and completeness after you enter or change any information, or print a report.
