CatFinder is a disk management tool that catalogs your disks and provides an intuitive Finder-like interface for browsing the catalogs. Floppies, hard disks, CD ROMs, any disk can be cataloged with CatFinder. Once a disk is cataloged you can quickly browse the disks contents without having the disk mounted. CatFinder also offers powerful search and report features to help you find and organize your files. CatFinder will even print diskette labels.

CatFinder is a shareware product. You can try CatFinder for free, if you wish to continue using CatFinder you are required to pay the registration fee. The registration fee is \$25. When you register, you will receive a diskette containing the latest release, complete documentation, and a registration code that will disable the shareware notice when CatFinder is started. Refer to the chapter "Registration Information" for details on how to register.

Please feel welcome to contact me online or via US mail about bugs or enhancements. I can be reached online at:
