

Project CODE 1.0

1 of 4

by James Hejl

Page

Documentation

Project CODE is a drag-and-drop application. To use Project CODE, drag any Macintosh application to the Project CODE icon.

Project CODE will report if the subject application contains 68k code, native PowerPC code, or both (FAT binary).

Multiple applications may be selected and dropped at the same time.

Licence Information

Project CODE is Freeware. You may distribute this application freely.

Technical Support

No technical support for Project CODE is offered.

••• Note: Project CODE opens all files with a "read only" permission. Project CODE does not modify applications in any way.
