Mac CallerID©

By Lee Cohen

•••

Mac CallerID©   is shareware.   If you decide to continue using it, please register your copy of Mac CallerID© .   When registering use the Register Program and print out the registration form please choose one of the following options:

Mac CallerID©   (Standard Version)
($20)

Mac CallerID© Pro (Includes PageMe)   ($30)

If you are a registered user, you can upgrade from the standard version to the Pro version.

Mac CallerID© Pro Upgrade (Must be Registered User)($10)

Folow the instruction in the file called: "Register Information"

I put a lot of time and effort into the program.
I have attempted to make it easy to use as well as bug free and most of all useful.   As long as people pay me for my efforts I will continue to update and improve the application.
Any suggestions are welcomed.

If you use the application and don't pay for it, who will.

Send REGISTRATION FORM and payment to:

DESCRIPTION

Mac CallerID© is a shareware application that will display and
store specific information provided by your local telephone
company.   You must subscribe to your local telephone company's
"caller information and identification service," commonly known
as Caller ID.   This application is similar to the Caller ID
boxes available in many stores, but is available at a fraction
of the cost.   A lot of work went into the application, and
hopefully you will agree that it is worth the nominal fee or
more.

The caller's name, number, date and time can be displayed as a single call or in a list of all calls.   Mac CallerID should work in the United States, Canada and Sweden.

Mac CallerID©   REQUIRES THAT YOU ARE IN AN AREA WHERE CALLER ID IS AVAILABLE, YOU ARE A SUBSCRIBER AND HAVE A MODEM THAT SUPPORTS CALLER ID.

What is Caller ID?

Caller ID is a way for you to determine who is calling before you answer the phone.   Between the first and second rings, the phone company sends information about who is calling. Not all the information is always available, many times the call might have originated from an area that does not support Caller ID.   At other times the call may be blocked by the calling party.

REQUIREMENTS

- Desktop Macintosh
- System 7 or greater
- Modem with Caller ID support
- Caller ID service must be provided by your local telephone company and you must subscribe to
the service.

Mac CallerID©   - STANDARD FEATURES (UNREGISTERED VERSION)
- Mac CallerID© displays the complete telephone number, name,

area code, time and date of the call.
- It can display a single call or a list of all calls.   All available information will be displayed.   Calls that have no data will not be displayed.
- Calls with phone numbers can be dialed via the Macintosh speaker or through the modem.
- The Mac CallerID© database can be read into ClarisWorks or another similar application to create an instant database of callers.
- New calls will be displayed automatically, you will be notified by the flashing new call indicator in the top right hand corner of the window.   Clicking any button or the new call indicator will stop the indicator from flashing.
- Metro Dialing Option, this enables you to dial a number that requires an area code but does not need a 1 in front of the number.
- Works in the United States, Sweden, and Canada.   Tested in the following Canadian Provinces: Manitoba, Saskatchewan, and Ontario.
- Works with Supra, Zyxel, Motorola, some Global Village, and PowerBit modems.

Mac CallerID©   - STANDARD FEATURES (REGISTERED VERSION)

- Printing a single call or a list of all calls.
- SubstituteCaller.   When a call comes in with a telephone number and no name, Mac CallerID©   will attach the specified name.
- Find the next or previous occurrence of a name, phone number or date in the database.
- Many "Core" Apple Events are supported.   Supported events from the "Core" suite are: count, delete, get data, get data size.
  Note "DELETE" will delete the specified call without prompting the user.
  Miscellaneous AppleEvents: InitModem and ReleaseModem.
- Copy the currently displayed or selected caller information to the clipboard.
- PREFERENCES FEATURES:

- Replace displayed name with user specified name.
    For example if a call comes in with XYZ company
    303 123-1234, you can specify that the name be replaced
    with Mr. Nobody.   This is done by adding the name and
    number to the "SubstituteCaller" dialog.
  - Hide or shrink the Mac CallerID©   window when the application is in the background.
  - Bring Mac CallerID©   to the front when a call comes in.
  - Delete all calls that do not have a number when quitting the application.
  - Delete all calls when quitting the application.
  - Display the single or all calls view when starting Mac CallerID© .
  - Speak the name or number of the caller.
    Note you must have the Speech Manager Extension installed to use this feature.
  - Launch a specified application when a new call comes in.

Mac CallerID©   - PRO FEATURES

- PageMe - Have Mac CallerID©   call your pager when an important call comes in.   Specify who can or can not page you and more.

INSTALLATION

Double click on the self extracting archive and select a destination for the Mac CallerID©   folder.

USE

To use Mac CallerID© , turn your modem on, and double click on the application.

LEGAL

No warranty of the use of the application is expressed or

implied.   In no event will the author be held responsible for
any damages or loss as a result of using Mac CallerID©.

LIMITATION MAY NOT APPLY TO YOU.

IN NO CASE SHALL THE COPYRIGHT HOLDER'S LIABILITY EXCEED
THE PURCHASE PRICE FOR THE SOFTWARE.

UPDATES VIA E-MAIL

Updates via e-mail are free for the standard version and
any additional features that you purchase.   New features may
or may not be included as a standard feature and may require
an additional fee to activate them.

UPDATES VIA POSTAL MAIL

Registered users are entitled to one free update disk.
After your one free update each additional update will
require prepayment in U.S. dollars.   For foreign updates
please use checks or travelers checks drawn on U.S. banks,
or international money orders.

Updates via regular mail are as follows:

Domestic Update Disk

 ($5 U.S.)

 International Update Disk

($10 U.S.)

These fees are to cover shipping and handling and the
additional time required to process.

PROBLEMS

If you encounter any problems please read the
"•• ROBLEMS ••   Read Me" file.
I will try to have a solution to your problem as soon as
possible.

HELP

Balloon Help is available for most dialogs and dialog items.

RELEASE NOTES

Release 1.1.3
•   Accelerated for Power Macintosh.
•   Now uses Communication Toolbox.   Note you must have the
    "Serial Tool" installed in your extension folder.   This
    extension is not and will not be supplied with Mac CallerID.
•   Now supports Alphanumeric paging wsing the TAP/IXO Protocol.
•   Adds ability to suppress the delete confirmation dialog by
    holding down the command key.
•   Improved Speech routines.

Release 1.1.3a
•   Fixes a bug with numeric paging and adds the ability to
    specify the modem initialization string for PageMe.

Release 1.1.3b
•   Adds Register Program to simplify the registration process.

Thank you for registering,

Lee
