

Balloon Help

To increase the amount of menu bar space available, you may remove the Balloon Help icon. To do this, click the check box labeled “Remove Balloon Help Menu” so it is checked.

You can still access Balloon Help using the Instant Balloon Help keys. These allow you to turn on Balloon Help by holding down modifier key(s) and moving the cursor over an item to display its help description.

Use the check boxes to configure the modifier keys to turn on Instant Balloon Help. The default keys are Control-Shift-Option-Command.
