

Hey Windows 3.1 / 3.11 User !!!

Now that you've improved the readability of your DOS windows, improve the look of Windows itself. By changing the look of the next version of Windows, even Microsoft has acknowledged that Windows needs a makeover. But if you want your Windows to look better now, get **Makeover for Windows** today!

Makeover is a set of utilities that can improve the way Windows looks, or dramatically change it.

Add 3D and other effects to title bars, sizing borders, and menu bars with **OSFrame**. And make your windows explode with a fully configurable zooming effect.

Ever tried changing your button colors in Control Panel? With **ButtonMaker** you can colorize title bar and scroll bar buttons to match, or even create your own designs. Predefined buttons that mimic other operating systems are provided to get you started. (Pssst, many of our users love the pseudo-Motif look)

Use **IconMaker** to modify the icons and cursors in just about any Windows program. Now you can change how a minimized program's icon looks, or make a cursor more pleasing. ALL of the system cursors can be changed, with no memory or resource usage.

And it's not just another pretty interface...

Calculators, a keyboard utility that helps prevent reversed case sentences, and a program to test your display driver are also included.

You also get **MidiKeys**. Use it to play sounds or WAV files on your sound card. It's especially handy for setting up the MIDI Mapper, and it can even help you understand how MIDI works.

Now at a very special price!

Just for trying out this product from Firefly Software, you may qualify for an extra special price. The retail price for Makeover is \$39.95, but if you live in the USA or Canada, you can buy Makeover for just **\$10** per copy (plus \$3 shipping and handling to Canada). Outside of North America the price is \$30 plus \$3 S&H. These special prices are good only through 8/1/94, and apply only to the US English language version. Please read the order form carefully. We cannot ship to Japan, but a Japanese language version of Makeover may already be available in Japan by the time you receive this file!
