

Connectix Surf Express™ Deluxe Demo Read Me

Welcome to Surf Express™ Deluxe, the ultimate in internet performance software. Surf Express™ Deluxe consists of two parts - Surf Express™, the premiere Web browsing accelerator, and SuperSonic Search™, the greatest meta search tool on the market.

This read me has the following sections:

- Introduction to Surf Express™ and SuperSonic Search™
- System Requirements
- Compatibility Issues
- Uninstall Information
- Contact Information

What is Surf Express™ Deluxe?

Surf Express™ Deluxe is a software package consisting of two parts: Surf Express™ and SuperSonic Search™.

Surf Express™ uses the most intelligent Web caching technology available to identify the Web pages you visit repeatedly and store them on your hard drive. Then while you browse other pages, Surf Express will regularly check stored pages for updates. The result: your favorite pages will load an average of 4 times faster than if they were downloaded with a 28.8 Kbps modem (with a maximum possible speed up as high as 36 times faster).* And because Surf Express automatically refreshes your favorite pages, you get up-to-date versions of the pages you visit most.

SuperSonic Search™ is the one-stop search tool that makes searching the web easier and faster with better results!

This installer installs a full copy of Surf Express v1.5 that functions for 30 days. After 30 days, Surf Express will no longer work; use the Surf Express Installer application to remove Surf Express.

Please note that technical support is not available for this demo version. Registered owners of Surf Express receive unlimited free technical support via phone, fax, and e-mail.

For more information about Surf Express, visit the Connectix Web site at:

<http://www.connectix.com/>

Minimum System Requirements

Any Macintosh computer with a PowerPC processor (For 68K compatibility, see below)

Mac OS 7.5.5 or higher, including Mac OS 8.0

16 MB RAM

Standard (TCP/IP-based) Internet connection

12 MB unused hard drive space

Microsoft Internet Explorer 3.0 or higher, Netscape Navigator 3.0 or higher, or America Online 3.0 or higher

Open Transport 1.1.2 or later

Compatibility Issues

- Surf Express™ Deluxe is currently not compatible with 68k based Macintoshes (machines with 68000, 68020, 68030, and 68040 processors). Any additional information about 68k support will be posted on the Connectix web site (www.connectix.com).

- Using Surf Express™ 1.5, users can not view web pages from a Find Cache search unless they have an active connection to the internet. Connectix is investigating a fix.

- Surf Express™ 1.5 is incompatible with Spyglass Corporation's Surfwatch (<http://www.surfwatch.com/>). Connectix and Spyglass Software are investigating a fix.

- The "Default Browser" that you are prompted to choose during installation of Surf Express™ is the browser that the Surf Express™ application will use to view web pages from the cache using the FindCache feature. During installation, every supported browser that is on your machine will be configured to use Surf Express™.

- If there is not enough disk space, SuperSonic Search™ may not return any error messages when generating the html result file and will show a blank html page in the browser.

- When using AOL with SuperSonic Search™, the AOL browser will not open the search results unless the user is signed on to AOL.

Uninstall Information

Due to current installer technology, the Connectix Surf Express Deluxe™ folder might be left after the uninstall process. You can safely delete this folder after uninstalling Surf Express Deluxe™.

Contact Information

* Please send product comments and feature suggestions to the Surf Express Deluxe team using our Suggestions Web page:

http://www.connectix.com/connect/N_suggestions.html

(Due to the volume of mail we receive at this page, you will not receive a response.)

* To buy Surf Express Deluxe visit our How To Buy Web page:

http://www.connectix.com/html/where_to_buy.html

* For information about multi-unit purchases of Surf Express Deluxe, please e-mail our sales team: sales@connectix.com

* According to Connectix testing with 28.8 Kpbs modems. See <http://www.connectix.com/> for more details.
