

Game Builder allows you to create animated games using your favorite color paint or 3D rendering program and Game Builder.

This package is a shareware demo. It has a limit of two scenes. If you like it please send us \$30 (US). In return you'll receive the latest version of Game Builder with a limit of 99 scenes and a manual which includes a tutorial on how to create an adventure (manual subject to availability). Also, a bundle of other software created at Mind-ware™ will be sent at no extra charge. We'd also be real interested to see what has been created with this product.

Send payments, comments and inquiries to:
