Reminder v1.3

Reminder is a small program that reminds you of current birthdays and dates. The data can be edited in the program itself. Just put an Alias in the Startup Items-folder and you won't miss any birthday or date again.

Example:

The 1st time:

The first time you launch Reminder it will create a File called «Reminder Preferences» in the Prefernces-Folder, in which the birthdays and dates will be stored.
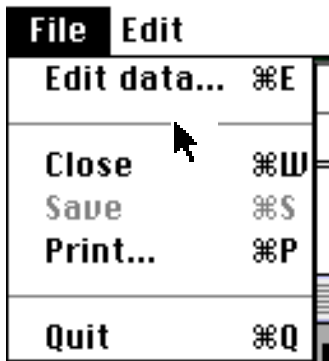

Autostart:

Put an Alias-File in the Folder «Startup Items» in the Systemfolder.

Reminder will be launched automatically after each Restart of your Mac. If there are no current messages Reminder quits instantly.
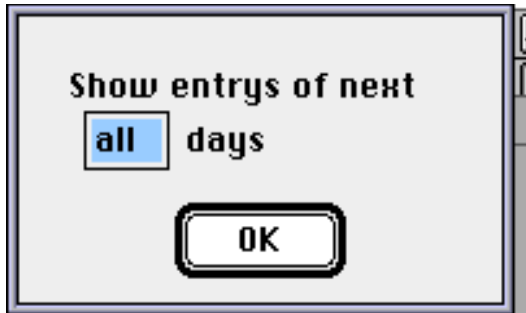

The automatic quitting is only activ short after restart, so that Reminder won't quit to allow making new entrys.

**Editting data:**

Choose 'Edit data...'

```
File  Edit
   Edit data...  ⌘E

   Close         ⌘W
   Save          ⌘S
   Print...      ⌘P

   Quit          ⌘Q
```

Choose the size of the selection (Integer or 'all')
(This can be repeated if you want more or less entrys to be displayed)

```
Show entrys of next
 [all]  days

    (   OK   )
```

days until	Date	Type	Prew.	Text
337	29.5.1917	B	7	John F.Kennedy
0	26.6.1972	B	7	Sue
6	2.7.1966	B	7	Tom
30	26.7.1944	B	7	Mick Jagger
54	19.8.1946	B	7	Bill Clinton
131	4.11.1973	B	14	Me
1	27.6.1996	T	7	2 pm Meeting with boss
182	25.12.1996	T	14	Christmas
189	1.1.1997	T	1	Happy New Year

All Entrys

New Entrys:

Choose 'New Entry......' (a new entry will appear above the selected one)

```
Edit
   New Entry...    ⌘N
   Modify Entry... ⌘M

   Cut             ⌘X
   Copy            ⌘C
   Paste           ⌘V
```

New Entry:

| 19.8.1946 | Type : Birthday | Prewarning: 7 days |

Bill Clinton

[Cancel]   [OK]

Modify entrys:

Choose 'Modify Entry...' oder double-click on it

Deleting entrys:

Choose 'Cut' or hit the o-Key

Order entrys:

Use Cut / Paste to order the Entrys

Bugs, questions, omprovments and postcards to:

This program is Postcardware: If you use it, send me a postcard :-)

Bugsfixes:

1.1:   Birthdays before 24. May 1928 caused wrong 'days until'-numbers. This is now fixed.

1.2:   Added printing functions, optimized scanning of entrys

1.3:   Removed bugs in list-display and main-window
