

Introduction

The conjugation of verbs is one of the difficult parts in learning many foreign languages since there are a lot of inflection patterns. Verbs is an application that helps you learn and refresh your knowledge about conjugation rules of foreign language verbs.

Features

The program lets you define a foreign language verbs databases and share them with other users. You can easily introduce the conjugation patterns (rules) for the regular verbs. You can also include other information about each verb like translation, grammar characteristic, comments etc. in a very convenient form. Comments (you can use many fonts and styles in the comment box) are useful to store the example sentences associated with the given verb and to include some additional information. The program has an exercise window. It automatically generates the exercises to practice the conjugation of verbs. You can gather the verbs that you have learned already and let the program generate exercises just for this group of verbs. You can also define many other groups of verbs to use them in exercises or for browsing. You can also attach databases updated by other users to your own verbs database (to share comments, sound and adding new verbs). The program can use file sharing to share the same database in the networked environment (language labs).

Limitations of Unregistered Version

If you do not register the program then some of the features are not available. Unregistered user can browse only the first 50 verbs from the verbs database.

Registration

To get the access to all features of the program you should register your copy. The single user non-transferable licence is \$10 (or the equivalent in your local currency). You can send cash, money order (except postal money order), postal transfer or cashier check (you can also try to send your American personal check (no Eurochecks please) but I'm never sure if I can cash personal check - usually I can but not always) to:

Jacek Iwanski
ul. Opolska 42/8
46-045 Turawa
POLAND.

tel. +48/77/212237
e-mail. jiwanski@alpha.luc.ac.be

If you register before the release of the next version you'll receive the upgrade for free, if you pay after the release of the next version then to receive an upgrade you will have to pay the price difference (if the fee for the next version is higher). If you want to use the program in the language lab or over the network then the single machine license is \$100 and the site license for all computers within your network is \$200 (this includes e-mail support).

Please, include your e-mail address with your payment so I can immediately send you the registration code.
