

## Classroom Publisher Demo Installation

Click the Install CP Demo button to begin the installation. As the files are installed, you will be prompted to insert each of the distribution disks.

Use the Drive button to select the disk where you would like to install Classroom Publisher.

This installer will create a folder named "Classroom Publisher" on your hard drive. It will hold the application along with a group of tutorial documents that are used to illustrate the examples in the manual.

It will also create a folder named "STAZ" inside the System folder. This will hold all the files necessary for Classroom Publisher's operations as well as a large number of stationery documents.

### Customizing the installation

You may reduce the amount of space required by eliminating some of the files. Click the Customize... button to select a custom installation.

Note: Some virus-protection programs (GateKeeper, SAM, Virex, etc.) may warn you about some of the operations performed by the installer. This is normal. You should always give the installer permission to perform the requested operation. You may find it easier to disable any virus-protection programs before running the installer.
