**SPECIFICATIONS**

**DESCRIPTION**

Black Hole is a geometric game of skill and strategy, in which the player saves a doomed Earth from deadly radiation using a system of Red Energy Balls and Reflectors.

**SCENARIO**

A hostile galaxy in the abyss of space has directed deadly radiation at Earth. The protective shield of Earth's Superfield is now broken into Energy Balls. Every living creature is doomed if you fail to rebuild the Superfield. You can use your computer to control the Energy Balls. If you are good at directing and colliding them, you can accumulate energy, rebuild the Superfield and repulse the enemy attack. The very existence of our civilization now depends on you!

**FEATURES**

- Demo
- 16 levels of skill, within 15 levels of speed
