

Get Medieval

Fans of the old Gauntlet games rejoice. Here's a game that'll bring back that old nostalgic feeling. Get Medieval features gameplay very similar to Gauntlet's. It uses an overhead view and takes place on the outskirts of the city of Dirindale. The city lays in ruins, and the castle that once belonged to King Aaron of Arrivus, former ruler of the realm, has been sacked by a host of evil creatures and one big bad dragon. The king has offered fame, fortune, and power to anyone who can destroy the dragon and rid the castle of evil. You can play as any of the four characters--the Archer Eryc, the Barbarian Zared, the Sorceress Levina, or the Warrior Kellina--who have come to Dirindale in the hopes of gaining the throne. With its addictive gameplay and humorous dialogue, this is a game you don't want to miss.

This demo will allow you to play a few levels of the Dragon Quest.

System Requirements:

P90

16MB RAM

Windows 9x (DirectX 5.0)

2MB SVGA Video Card

DirectX-Compatible Sound Card

Price: \$40
